02 Website URL

Audited URL	https://www.sparkonomy.com/
Final URL / canonical	https://www.sparkonomy.com/ (HTTP 200, no redirect; <link rel="canonical" href="https://www.sparkonomy.com/">)
Page title	Sparkonomy – Sparking Creator Livelihoods
Language	<html lang="en">, og:locale en_IN
Scope	Homepage only. Linked pages (/creator/earn, /about, /contact, /blogs, /legal/*, creatorgraph.sparkonomy.com) are recorded as destinations, not audited.
Capture method	Real Google Chrome driven by Playwright. Automated pass (tools/capture.cjs): DOM, computed CSS, stylesheets, network log, Web Animations, style-mutation log, hover states at 1440×900, 834×1112 and 390×844. Logical-section pass (tools/logical-shots.cjs): scrolls to each story beat using the site's own beat maths and waits for the reveal/ink animations, plus cookie banner, mobile menu, hover and component crops. Page JS/CSS bundles were read to extract animation timings. Original assets downloaded from their source URLs (tools/download-assets.cjs).
Document height	desktop 17,082px · tablet 20,766px · mobile 15,984px

03 Homepage overview

Sparkonomy's homepage is a single, dark, **scroll-driven story** ("Sparking Creator livelihoods") that introduces the company through the founders' YouTube/Google background and ends in its first product, **Open Creator Graph** — a free "Creator Record" that lets Creators be visible to AI and control how AI uses their identity. Every conversion point goes to the external app <https://creatorgraph.sparkonomy.com>.

Structure

- A fixed, transparent **header** (wordmark, 4 links, gradient pill CTA; hamburger + full-screen menu below 768px) over a fixed full-viewport **WebGL fluid-ink canvas** and a radial vignette that stay behind everything.
- **Hero** (not pinned): animated gradient "Sparkonomy" wordmark, tagline, a "NEW" launch card for Open Creator Graph with the CTA, a partner-logo marquee (Meta, YouTube, Google for Startups, Gemini) and a "READ OUR STORY" cue.
- **Six pinned story screens** (`position: sticky` panels inside 200–420svh tall sections) whose lines reveal "beat by beat" as you scroll, with word-by-word colour "ink" effects.
- **Creator Record** demo (normal flow): example record card for "Chulbuli Dixit" with per-facet AI-usage stances, plus the second CTA.
- **Closing** pinned screen ("And we're only getting started." / "Let's spark together.") and a black **footer**.

Character

Black canvas, white Roboto type at large sizes (64px headlines at 1440px), a two-colour brand gradient (magenta #DE0075 → violet #8134AF) used for CTAs and word highlights, and constant ambient motion (fluid simulation, wordmark pulse, CTA gradient sweep). The page also **auto-plays**: after 10 seconds without input it starts scrolling itself through the story.

Facts

- Document height at 1440×900: 17,082px (fully rendered; the first automated capture measured 17,374px before the lazy card settled). 390×844: 15,984px. 834×1112: 20,766px.
- Headings: 1 H1 ("Sparkonomy"), 9 H2s, 1 H3. Links: 8 internal destinations (/, /creator/earn, /about, /contact, /blogs, /legal/privacy-policy, /legal/terms, /legal/refund-policy), 1 external app (<https://creatorgraph.sparkonomy.com>) linked 5 times, 5 social profiles (footer only).
- Built with Next.js 16.0.7 (App Router, Turbopack), React 19, Tailwind CSS, Framer Motion; hosted behind Google Frontend; GTM + GA4 + Microsoft Clarity + CookieYes.

04 Homepage section map

Logical sections in scroll order. The DOM itself has only five top-level nodes — two fixed background layers (WebGL canvas, vignette), the fixed `<header>`, one long `<main>` containing nine `<section>`s, and the `<footer>` — so sections are mapped by their `section#id`. Scroll positions are for 1440×900.

```

#	Section	DOM anchor	Scroll top → bottom (px)	CSS height	Behaviour	Purpose
1	Header / navigation (incl. cookie banner + mobile menu)	header, div#story-menu	0 → 80	fixed, 79.5px (+112px scrim)	fixed overlay	Persistent brand mark and route to the four other site areas, plus the always-visible primary conversion CTA ("Claim your Creator Record") to the external Open Creator Graph app. On mobile the links collapse into a full-screen menu that also carries the partner and compliance badges. On first visit a CookieYes consent bar is overlaid at the top.
2	Hero — "Sparkonomy" + Open Creator Graph launch card	section#opening	0 → 900	min-height: 100svh	normal flow	Brand statement (animated wordmark + tagline "Sparking Creator livelihoods.") and the launch announcement for the first product, Open Creator Graph, with the primary CTA. Credibility via a "built with" partner-logo marquee (Meta, YouTube, Google for Startups, Gemini). Ends with a "READ OUR STORY" cue that starts the scroll story.
3	Story 1 — "For 15 years, we helped build YouTube from inside Google."	section#roots	900 → 3,195	255svh	sticky 100svh stage, 2 beat(s), accumulate	Founder credibility: the team's 15-year history building YouTube at Google, and the emotional hook — the Creators.
4	Story 2 — "Students. / Homemakers. / Doctors. / Farmers."	section#people	2,295 → 6,075	420svh (margin-top -100svh)	sticky 100svh stage, 5 beat(s), accumulate	Shows who Creators are — ordinary people from every walk of life who built a living on camera.
5	Story 3 — "And we saw what it takes."	section#reality	5,175 → 8,955	420svh (margin-top -100svh)	sticky 100svh stage, 5 beat(s), soften	Empathy for the solo Creator: no crew, no scriptwriter, no one else — just one person showing up every day.
6	Story 4 — "Creators built a new profession."	section#love	8,055 → 10,350	255svh (margin-top -100svh)	sticky 100svh stage, 2 beat(s), accumulate	States the problem: Creators built a profession, but too little was built for them.
7	Story 5 — "For years, we built the platform."	section#turn	9,450 → 11,745	255svh (margin-top -100svh)	sticky 100svh stage, 2 beat(s), accumulate	The turn: from building the platform (YouTube) to building for the Creators.
8	Story 6 — "That's why we built Sparkonomy."	section#mission	10,845 → 12,645	200svh (margin-top -100svh)	sticky 100svh stage, 1 beat(s), accumulate	Mission statement.
9	Creator Record — Open Creator Graph product demo	section#ocg	12,645 → 13,898	auto (min-height 100svh)	normal flow, 3 beats	Product proof: an example "Creator Record" (identity + AI-usage consent per facet, cryptographically timestamped and certified) next to the value proposition and the second primary CTA.

#	Section	DOM anchor	Scroll top → bottom (px)	CSS height	Behaviour	Purpose
10	Closing — "And we're only getting started."	section#future	13,898 → 16,688	310svh	sticky 100svh stage, 3 beat(s), accumulate	Forward-looking sign-off and brand sign line "Let's spark together."
11	Footer	footer	16,688 → 17,082	auto	normal flow	Secondary navigation (products, company, legal), compliance badges, copyright and social profiles.

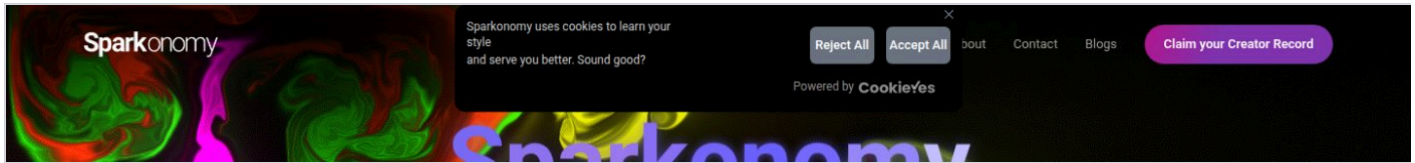

PERSISTENT LAYERS (NOT SECTIONS)

Layer	z-index	Content
div.fixed.inset-0.z-0	0	WebGL2 <canvas> 1440×900 (devicePixelRatio capped at 1), fluid ink simulation — see Animations
div.pointer-events-none.fixed.inset-0.z-[1]	1	radial-gradient(ellipse 68% 54% at 50% 50%, rgba(0,0,0,.62) 0%, rgba(0,0,0,.34) 46%, rgba(0,0,0,0) 76%)
header.fixed.top-0.z-40	40	Header (section 01)
.cky-consent-container	999999	CookieYes consent bar (first visit)

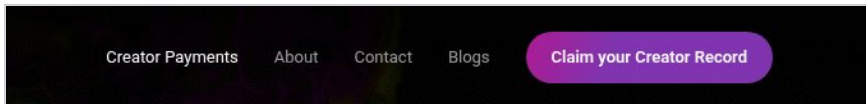

05 Header / navigation

Desktop header (1440px), cookie banner dismissed

First visit: CookieYes bar overlaps the nav links

Hover: "Creator Payments" turns white

Structure

- `<header class="pointer-events-none fixed inset-x-0 top-0 z-40">` — never changes on scroll (no sticky shrink, background or hide/show; compare screenshots at 0, 900 and 1200px).
- Scrim: `<div aria-hidden class="absolute inset-x-0 top-0 h-28 bg-gradient-to-b from-black/75 via-black/35 to-transparent">` (112px).
- Row: `max-width: 1344px; padding: 20px 32px; display: flex; justify-content: space-between` (mobile 16px 20px). Height 79.5px desktop.

Desktop navigation (≥768px)

Item	Exact label	URL	Style
Logo	(image, alt "Sparkonomy")	/	26px tall (24px mobile), <code>aria-label="Sparkonomy home"</code>
Link	Creator Payments	/creator/earn	13px/19.5px Roboto 400, <code>rgba(255,255,255,.6) → #FFF</code> hover
Link	About	/about	same
Link	Contact	/contact	same
Link	Blogs	/blogs	same
CTA	Claim your Creator Record	https://creatorgraph.sparkonomy.com (new tab)	gradient pill 193×40, 13px/600, padding 10px 20px

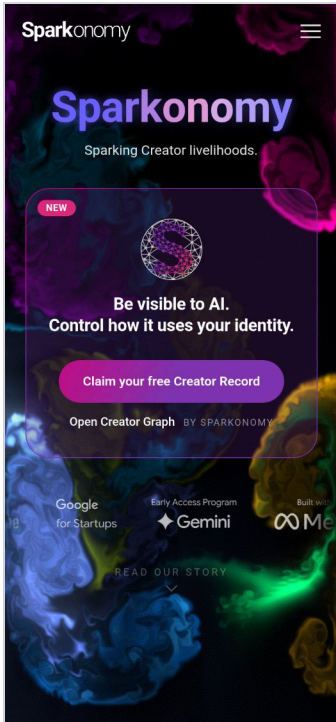

Gap between items: 28px (`gap-7`).

Mobile menu (<768px)

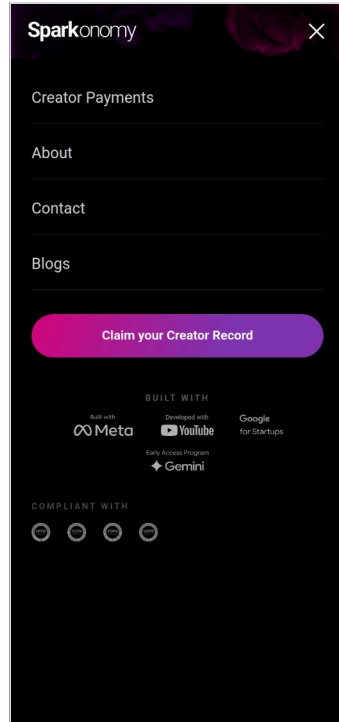

- Trigger: `<button aria-expanded aria-controls="story-menu">` 32×32, PNG hamburger icon 24px wide; becomes an X (two rotated 24×1.5px bars). sr-only label "Open menu" / "Close menu".
- Panel `#story-menu`: `height: 100svh; background: #000; padding: 16px 24px 40px`. Links 18px/28px, `rgba(255,255,255,.85)`, `padding: 16px 0, border-bottom: 1px solid rgba(255,255,255,.1)`; full-width CTA (15px/600, `padding: 14px 20px, margin-top 28px`); "BUILT WITH" partner logos (centred, 26px tall, opacity .7, margin-top 40px); "COMPLIANT WITH" badges (22px, opacity .55). Labels 10px bold uppercase, letter-spacing .22em, white/35 and white/30.
- Behaviour: instant show/hide (no animation), body scroll locked, closes on Escape / link tap / resize to ≥768px.

Cookie banner (CookieYes)

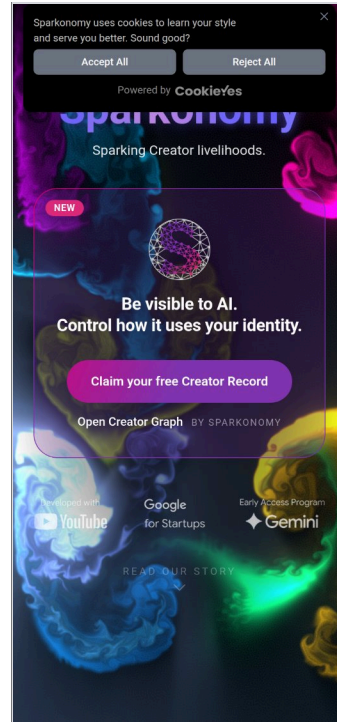

- Container `.cky-consent-container.cky-banner-top`: `position: fixed; top: 0; left/right: 12px; z-index: 9999999`.
- Bar: black, radius 10px, 520×109px centred on desktop (366×127 on a 390px phone). Text 12px/16.2px `rgba(255,255,255,.8)`.
- Copy: "Sparkonomy uses cookies to learn your style / and serve you better. Sound good?" — buttons "Reject All", "Accept All" (13px/500, radius 6px, `rgb(107,114,128) → rgb(184,30,102) + brightness(.9)` on hover), × close, "Powered by CookieYes".
- On desktop it overlaps the nav links until dismissed.

Mobile 390: closed

Mobile 390: menu open

Mobile 390: cookie banner

Desktop after 1200px scroll
(unchanged header)

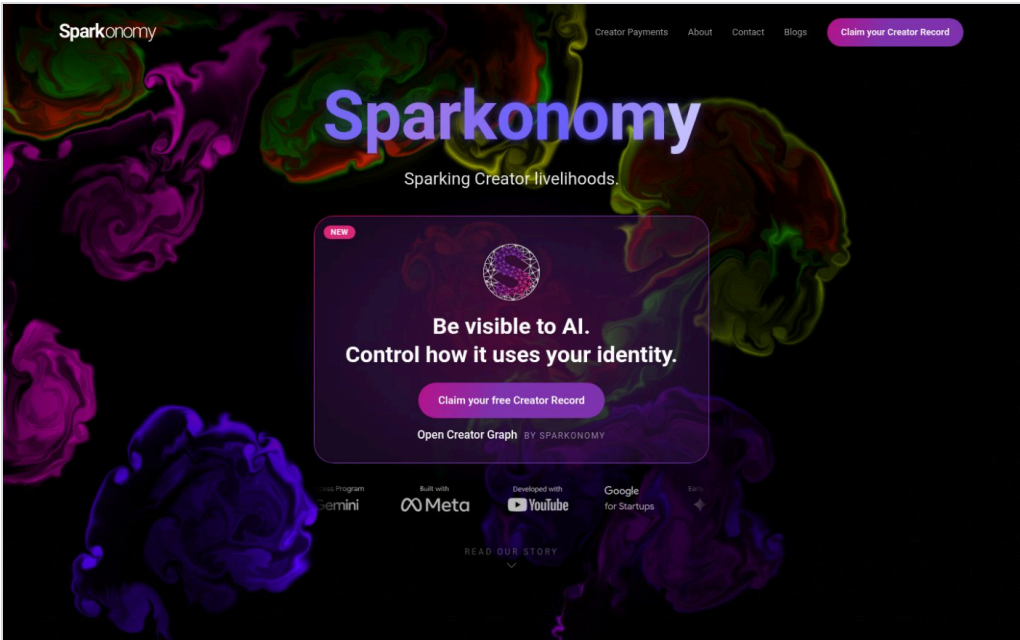

Interaction

- Nav links: `color: rgba(255,255,255,.6) → #FFFFFF` on hover, `transition: color .15s cubic-bezier(.4,0,.2,1)`.
- CTA pill: continuous `cta-sweep` gradient animation (3.5s ease-in-out infinite alternate); hover `opacity: .9` (150ms).
- Hamburger: toggles `aria-expanded`, sr-only label switches "Open menu" ↔ "Close menu", icon swaps to an X drawn with two 24×1.5px white bars rotated ±45°. Menu opens/closes instantly (HTML `hidden` attribute, no transition), locks `body { overflow: hidden }`, closes on Escape, on link tap, or when the viewport becomes ≥768px.
- `pointer-events: none` on the header wrapper so the WebGL canvas behind keeps receiving pointer moves; only links/buttons are `pointer-events: auto`.
- Cookie banner (CookieYes): "Reject All"/"Accept All" buttons `rgb(107,114,128) → rgb(184,30,102) + filter: brightness(.9)` on hover; close (x) button; "Powered by CookieYes" link. The footer "Cookie Policy" button (`.cky-banner-element`) re-opens it.

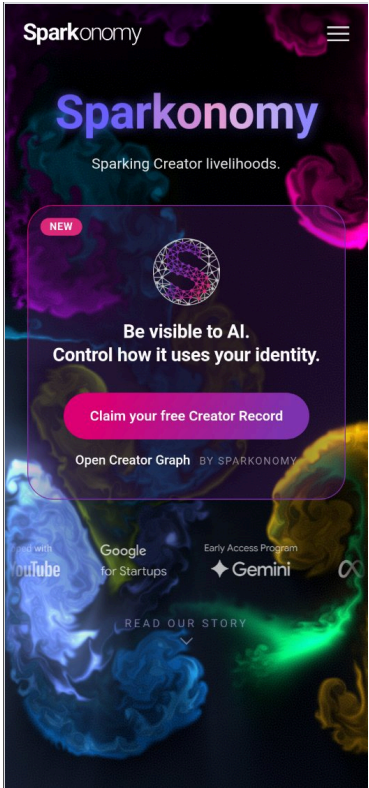

Notes

- The CookieYes bar (fixed top, `z-index: 9999999`, black, 10px radius, 520px wide on desktop / full width minus 12px gutters on mobile) sits on top of the header and on desktop hides the "About"/"Contact" links until dismissed; on mobile it covers the hero wordmark.
- Logo link has `aria-label="Sparkonomy home" → /`.
- No language switcher, search, login or account entry on the homepage header.

06 Hero

Desktop 1440×900 (after intro)

Mobile 390×844

Content

- **H1:** "Sparkonomy" — 96px/96px Roboto 700, letter-spacing `-0.96px (-0.01em)`; 50.7px at 390px (`clamp(2.75rem, 13vw, 3.5rem)`).
 - Each letter is a span coloured along a 3-stop ramp: `S rgb(123 108 246) · p rgb(142 116 240) · a rgb(160 124 234) · r rgb(179 132 229) · k rgb(198 139 223) · o rgb(216 147 217) · n rgb(232 158 214) · o rgb(235 185 228) · m rgb(237 211 241) · y rgb(240 238 255)`, with `text-shadow: 0 0 20px rgba(108,99,255,.3)`.
- **Tagline:** "Sparking Creator livelihoods." — 24px/32px, `rgba(255,255,255,.9)` (16px on mobile).
- **Launch card:** "NEW" badge (`#DD2A7B` pill, 11px bold uppercase, padding 4px 10px, top-left 14px), Open Creator Graph mark (80×80), H2 "Be visible to AI. / Control how it uses your identity." (32px/40px bold; `min(20px, 5.2vw)` mobile), CTA "Claim your free Creator Record" (263×51), caption "Open Creator Graph" (16px/500) + "BY SPARKONOMY" (12px uppercase, letter-spacing .12em, white/50).
- **Partner marquee:** 4 white logos, 36px tall, opacity .75, gap 48px (40px mobile), masked `linear-gradient(90deg, transparent, #000 10%, #000 90%, transparent)`.
- **Scroll cue:** "READ OUR STORY" 12px uppercase, letter-spacing .22em (2.64px), colour `#FFFFFFF4D` + chevron.

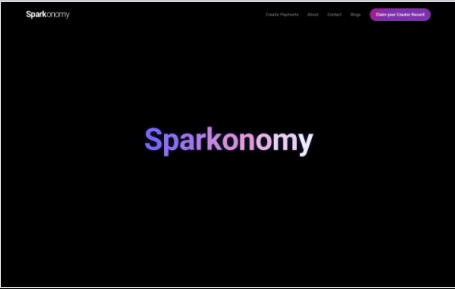

Intro sequence (from the page bundle, verified with timed screenshots)

Time after hero mount	What happens
0 ms	Only the wordmark is visible, vertically centred (launch row collapsed: <code>grid-template-rows: 0fr</code> , <code>spacer flex-grow: 1</code>). Wordmark pulse/float loops start.
200–900 ms	Tagline enters (<code>tailwindcss-animate</code> fade-in + slide-in-from-bottom 0.75rem, 700ms, delay 200ms).
~300–1500 ms	Fluid canvas mounts on <code>requestIdleCallback</code> (timeout 1,500ms; 300ms fallback).
3,000 ms (or first wheel / touchmove / keydown)	"Ready": row expands (<code>grid-template-rows</code> 1,000ms ease-in-out), spacer collapses (<code>flex-grow</code> 1,000ms), fluid gets a 10-splat burst.
+1,000 ms	Launch card: opacity <code>0 → 1</code> , <code>translateY</code> 8px <code>→ 0</code> , 900ms ease-out.
+1,050 ms	Row <code>overflow: hidden</code> removed (card glow can bleed).

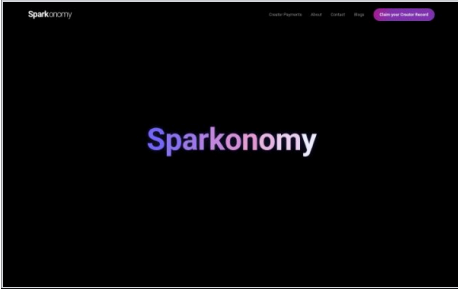

Time after hero mount	What happens
+1,700 ms	Partner row reveals (900ms) and the marquee starts moving.
+2,200 ms	READ OUR STORY reveals (900ms).

In the captured run (proxied network) the tagline became visible at ~3.5s and the card at ~4.0s after navigation (see "Page-load sequence").

Launch card

Partner marquee (edge-faded)

Layout section#opening: min-height: 100svh, flex column, centred, padding: 80px 24px 64px (desktop) / 96px 24px 40px (mobile), text-align: center. Stack: H1 wordmark (96px desktop / clamp(2.75rem,13vw,3.5rem) ≈ 50.7px at 390px) → tagline (24px desktop / 16px mobile, margin-top:

16px) → launch card (max-width: 35rem = 560px desktop, 23rem = 368px mobile; border-radius: 28px; padding: 40px 40px 28px desktop / 36px 16px 32px mobile; margin-top: 36px) → partner marquee (560px wide, margin-top: 32px; full-bleed on mobile, margin-top: 48px) → READ OUR STORY (margin-top: 48px). Before the intro completes, the card row is collapsed (grid-template-rows: 0fr) and a flex spacer above the H1 grows so the wordmark sits in the vertical centre (see Animations).

Background

Shared fixed WebGL fluid canvas (black base, colourful ink plumes) + fixed radial vignette radial-gradient(ellipse 68% 54% at 50% 50%, rgba(0,0,0,.62) 0%, rgba(0,0,0,.34) 46%, rgba(0,0,0,0) 76%). Launch card: fill #8134AF33 (violet at 20%), 1px gradient border linear-gradient(133.52deg, #DE0075 5.08%, #8134AF 28.61%) drawn with a mask (mask: linear-gradient(#000 0 0) content-box exclude, linear-gradient(#000 0 0)), plus a soft glow behind it (desktop only) radial-gradient(50% 50% at 50% 50%, rgba(221,0,117,.22), rgba(129,52,175,.12) 45%, transparent 75%) extending 160px/112px beyond the card.

Notes

- The H1 contains an sr-only "Sparkonomy" plus an aria-hidden copy split into 10 coloured letters, so DOM innerText reads "Sparkonomy\nSparkonomy".
- "NEW", "BY SPARKONOMY" and "READ OUR STORY" are uppercase via CSS; source strings are "New", "by Sparkonomy", "Read our story".
- The hero is the only screen not pinned (normal flow, 100svh).

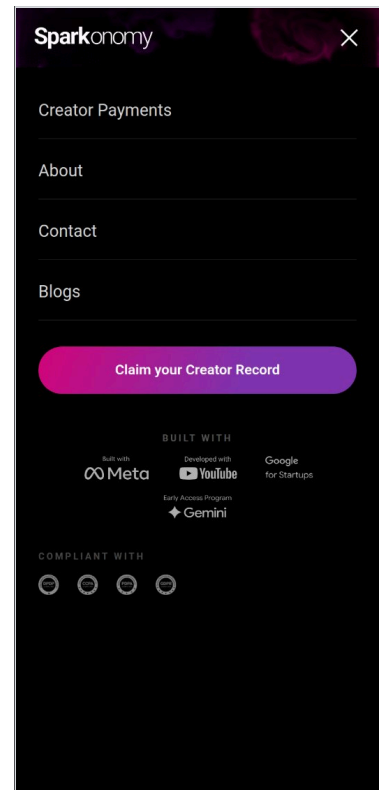

07 Every homepage section

Desktop screenshot (left) is taken at the scroll position where the section's last beat is fully revealed; mobile (right) at 390×844. Additional states follow where relevant.

01 · Header / navigation (incl. cookie banner + mobile menu)

Desktop 1440

Mobile 390

Position	1 of 11 · desktop scroll 0–80px
DOM anchor	<code>header</code> , <code>div#story-menu</code> — <code><header class="pointer-events-none fixed inset-x-0 top-0 z-40"></code> + <code>CookieYes .cky-consent-container</code> (injected by a third-party script)
Purpose	Persistent brand mark and route to the four other site areas, plus the always-visible primary conversion CTA ("Claim your Creator Record") to the external Open Creator Graph app. On mobile the links collapse into a full-screen menu that also carries the partner and compliance badges. On first visit a CookieYes consent bar is overlaid at the top.
Layout	Fixed, full-width, transparent bar (z-index 40) with a 112px-tall top scrim (<code>linear-gradient(rgba(0,0,0,.75), rgba(0,0,0,.35), transparent)</code>). Inner row: <code>max-width: 84rem</code> (1344px), <code>padding: 20px 32px</code> (desktop) / <code>16px 20px</code> (mobile), <code>display:flex; justify-content:space-between; align-items:center</code> , height 79.5px. Left: wordmark image 26px tall (24px <768px). Right (≥768px): <code><nav aria-label="Main"></code> flex row, <code>gap: 28px</code> , four 13px text links then the gradient pill CTA. <768px: the nav is hidden and a 32×32 hamburger button (24px-wide PNG icon) toggles <code>#story-menu</code> , a 100svh black panel (<code>padding: 16px 24px 40px</code>) under the bar.
Background	Transparent; legibility comes from the 112px black → transparent scrim. The header does not change on scroll (no background, shadow, shrink or hide-on-scroll — verified with screenshots at 900px and 1200px scroll). Mobile menu panel: solid <code>#000000</code> .
CTA	Claim your Creator Record → <code>https://creatorgraph.sparkonomy.com (target="_blank" rel="noopener")</code> ; same CTA repeated full-width inside the mobile menu.
Interaction	Nav links: <code>color rgba(255,255,255,.6)</code> → <code>#FFFFFF</code> on hover, <code>transition: color .15s cubic-bezier(.4,0,.2,1)</code>.

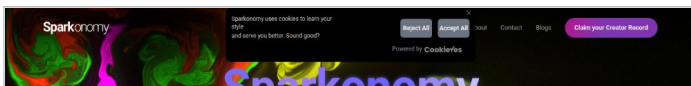

- CTA pill: continuous `cta-sweep` gradient animation (3.5s ease-in-out infinite alternate); hover `opacity: .9` (150ms).
- Hamburger: toggles `aria-expanded`, sr-only label switches "Open menu" ↔ "Close menu", icon swaps to an X drawn with two 24×1.5px white bars rotated ±45°. Menu opens/closes instantly (HTML `hidden` attribute, no transition), locks `body { overflow: hidden }`, closes on Escape, on link tap, or when the viewport becomes ≥768px.
- `pointer-events: none` on the header wrapper so the WebGL canvas behind keeps receiving pointer moves; only links/buttons are `pointer-events: auto`.
- Cookie banner (CookieYes): "Reject All"/"Accept All" buttons `rgb(107,114,128)` → `rgb(184,30,102)` + `filter: brightness(.9)` on hover; close (×) button; "Powered by CookieYes" link. The footer "Cookie Policy" button (`.cky-banner-element`) re-opens it.

Visual assets

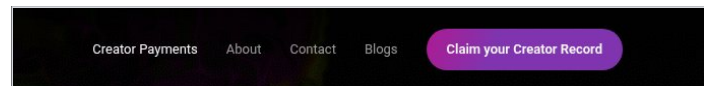

`logo_header_white.png` (991×188 wordmark, rendered 137×26), `hamburger_icon.png` (92×60, rendered 24px wide, mobile only). Mobile menu: 4 partner logos (26px tall, opacity .7) and 4 compliance badges (22px tall, opacity .55). Cookie banner: CookieYes `close.svg` and inline CookieYes wordmark SVG (78×13).

Notes

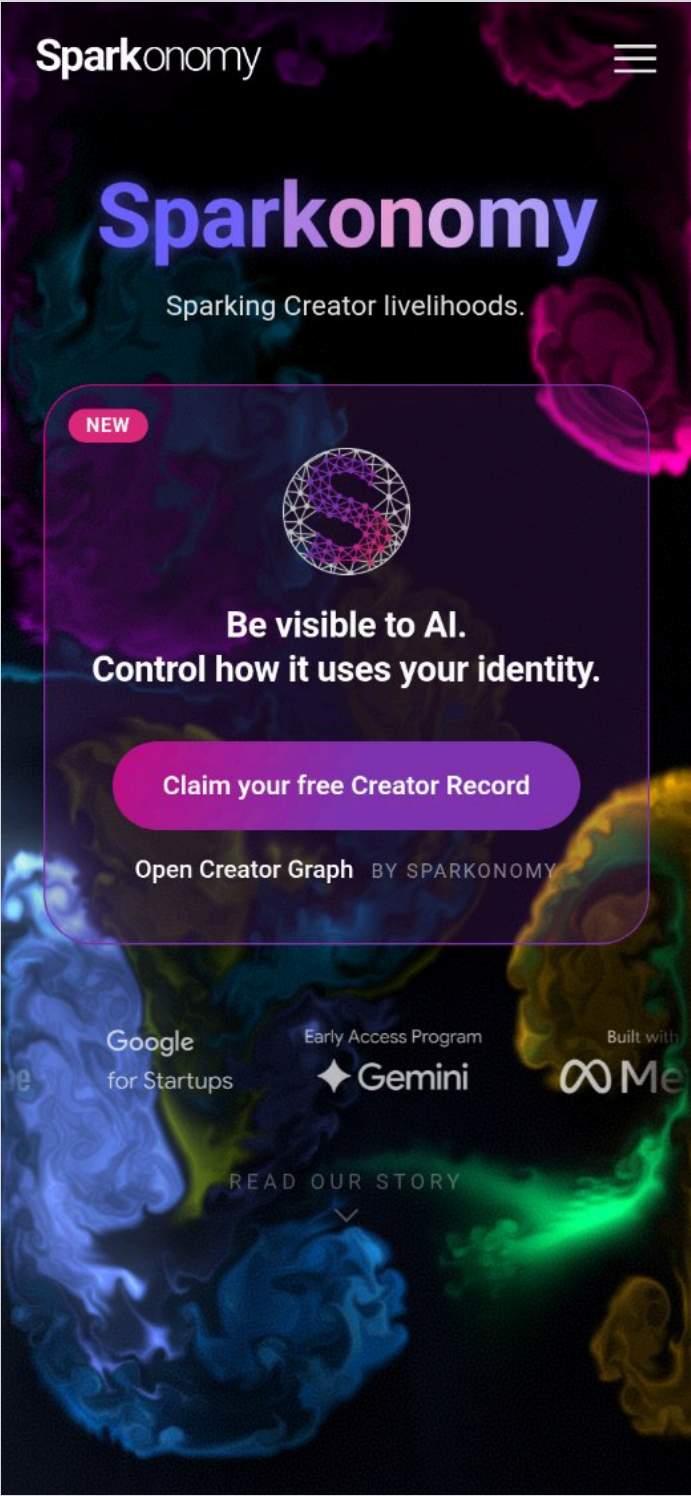

- The CookieYes bar (fixed top, `z-index: 9999999`, black, 10px radius, 520px wide on desktop / full width minus 12px gutters on mobile) sits on top of the header and on desktop hides the "About"/"Contact" links until dismissed; on mobile it covers the hero wordmark.
- Logo link has `aria-label="Sparkonomy home"` → `/`.
- No language switcher, search, login or account entry on the homepage header.

Mobile 390

Position	2 of 11 · desktop scroll 0–900px
DOM anchor	<code>section#opening</code>
Purpose	Brand statement (animated wordmark + tagline "Sparking Creator livelihoods.") and the launch announcement for the first product, Open Creator Graph, with the primary CTA. Credibility via a "built with" partner-logo marquee (Meta, YouTube, Google for Startups, Gemini). Ends with a "READ OUR STORY" cue that starts the scroll story.
Layout	<code>section#opening: min-height: 100svh, flex column, centred, padding: 80px 24px 64px (desktop) / 96px 24px 40px (mobile), text-align: center. Stack: H1 wordmark (96px desktop / clamp(2.75rem,13vw,3.5rem) ≈ 50.7px at 390px) → tagline (24px desktop / 16px mobile, margin-top: 16px) → launch card (max-width: 35rem = 560px desktop, 23rem = 368px mobile; border-radius: 28px; padding: 40px 40px 28px desktop / 36px 16px 32px mobile; margin-top: 36px) → partner marquee (560px wide, margin-top: 32px; full-bleed on mobile, margin-top: 48px) → READ OUR STORY (margin-top: 48px). Before the intro completes, the card row is collapsed (grid-template-rows: 0fr) and a flex spacer above the H1 grows so the wordmark sits in the vertical centre (see Animations).</code>
Background	Shared fixed WebGL fluid canvas (black base, colourful ink plumes) + fixed radial vignette <code>radial-gradient(ellipse 68% 54% at 50% 50%, rgba(0,0,0,.62) 0%, rgba(0,0,0,.34) 46%, rgba(0,0,0,0) 76%)</code> . Launch card: fill <code>#8134AF33</code> (violet at 20%), 1px gradient border <code>linear-gradient(133.52deg, #DE0075 5.08%, #8134AF 28.61%)</code> drawn with a mask (<code>mask: linear-gradient(#000 0 0) content-box exclude, linear-gradient(#000 0 0)</code>), plus a soft glow behind it (desktop only) <code>radial-gradient(50% 50% at 50% 50%, rgba(221,0,117,.22), rgba(129,52,175,.12) 45%, transparent 75%)</code> extending 160px/112px beyond the card.
CTA	Claim your free Creator Record → https://creatorgraph.sparkonomy.com (new tab). Secondary: "READ OUR STORY" button (no href; triggers the auto-scroll tour).
Interaction	Intro sequence on load (3,000ms timer or first wheel/touchmove/keydown): card row expands, card fades/slides in at +1,000ms, marquee row at +1,700ms, READ OUR STORY at +2,200ms; fluid background receives a 10-splat burst.

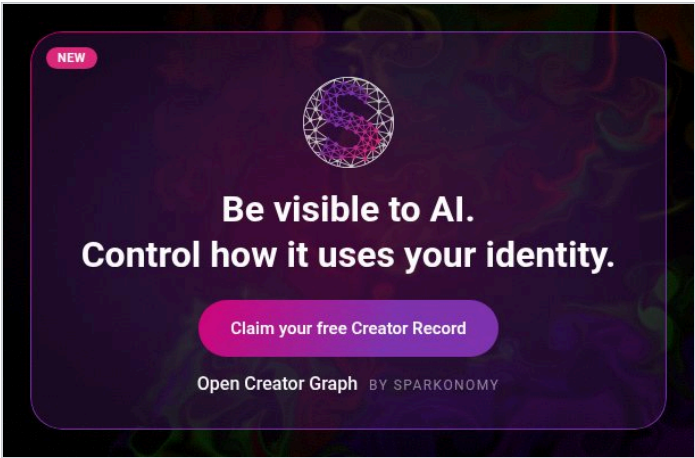

- Wordmark: letters pulse (0.5s alternate, staggered 0.1s) and the word floats 10px up/down (2s alternate).
- CTA: `cta-sweep` gradient animation, hover opacity .9.
- Partner marquee: 24s linear infinite loop, starts 1,700ms after the intro, paused while the hero is off-screen.
- READ OUR STORY: bounces 7px + colour pulse (1.4s loop); click starts the automatic "story tour" (auto-scroll through every beat).

Visual assets

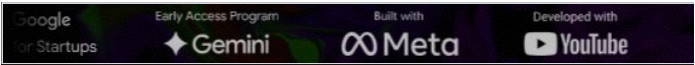

Open Creator Graph mark `/logos/ocg-mark.webp` (160×160, rendered 80×80 desktop / 72×72 mobile, preloaded, `loading="eager"` , `alt ""`). Partner logos (white PNG via `next/image`, rendered 36px tall, opacity .75): `Meta_White.png`, `Yt_White.png`, `Google_White.png`, `Gemini_White.png` — list rendered twice for the seamless loop (second copy `aria-hidden` , `alt ""`). Inline SVG chevron 14×8 under READ OUR STORY.

Notes

- The H1 contains an sr-only "Sparkonomy" plus an `aria-hidden` copy split into 10 coloured `<span>` letters, so DOM `innerText` reads "Sparkonomy\nSparkonomy".
- "NEW", "BY SPARKONOMY" and "READ OUR STORY" are uppercase via CSS; source strings are "New", "by Sparkonomy", "Read our story".
- The hero is the only screen not pinned (normal flow, 100svh).

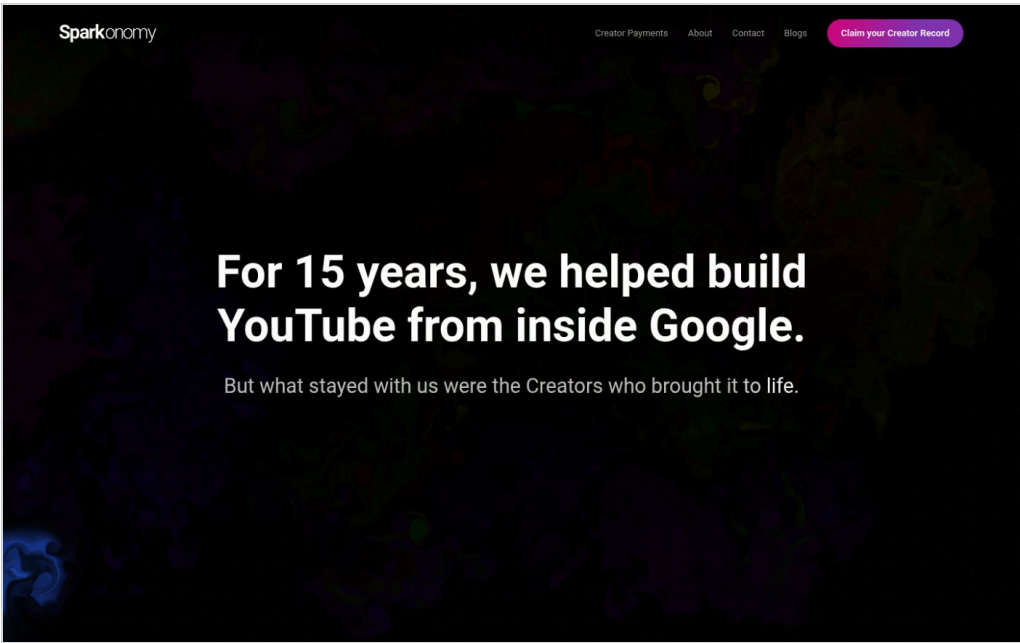

Launch card (desktop crop)

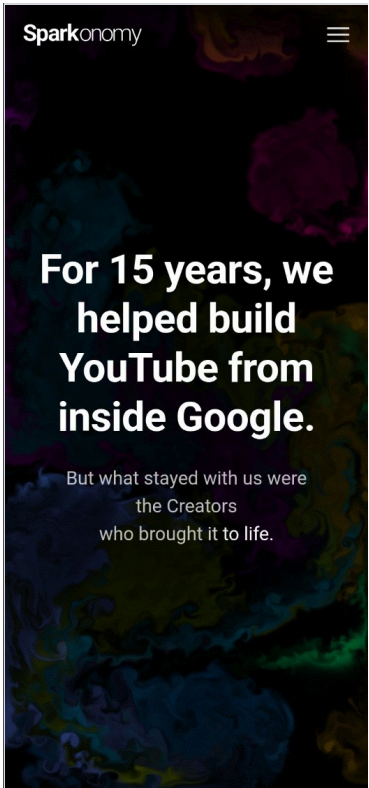

Partner logo marquee with 10%/90% edge fade mask

03 · Story 1 — "For 15 years, we helped build YouTube from inside Google."

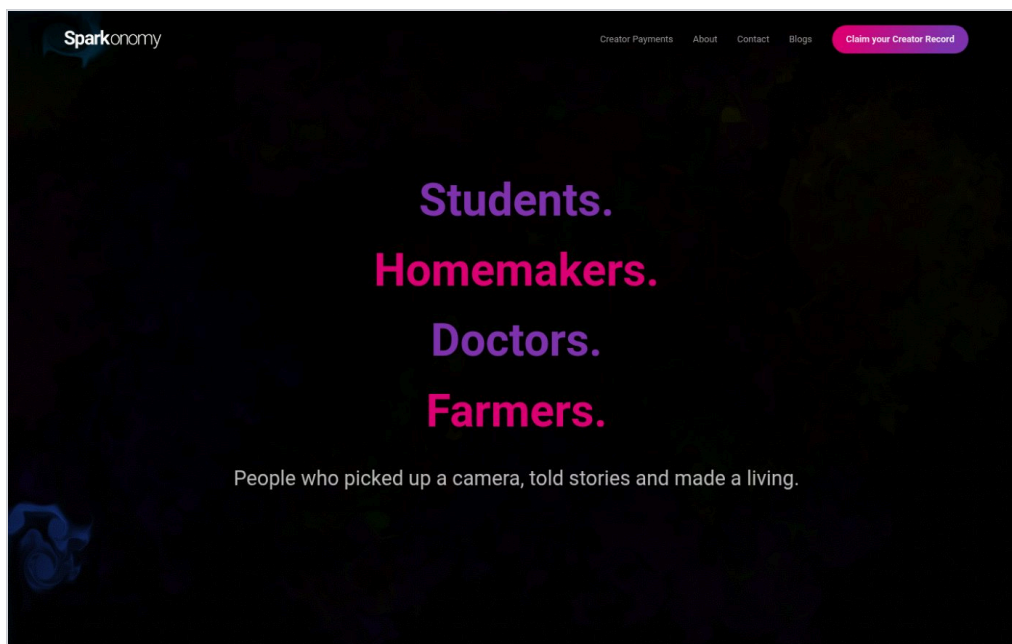

Desktop 1440

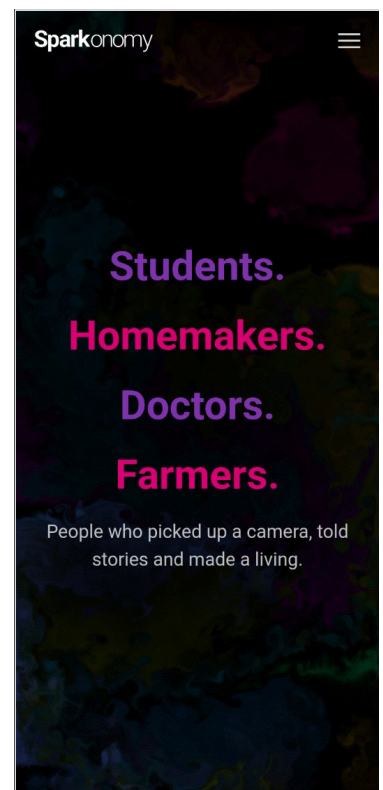

Mobile 390

Position	3 of 11 · desktop scroll 900–3,195px · beat stops at 1,148, 1,532px
DOM anchor	<code>section#roots</code>
Purpose	Founder credibility: the team's 15-year history building YouTube at Google, and the emotional hook — the Creators.
Layout	Scroll-pinned "screen": <code>section#roots</code> is 255svh tall (2,295px at 1440×900); its child is <code>position: sticky; top: 0; height: 100svh, flex-centred, padding: 0 24px; text block max-width: 64rem</code> (1024px; 46rem below 768px), centred. 2 beats: H2 (64px/76.8px bold desktop; 44px/52.8px mobile) then body (28.8px/43.2px desktop; 20px/30px mobile, <code>margin-top: 24px</code>).
Background	Transparent over the fixed fluid canvas + vignette.
CTA	None
Interaction	Beat 1 (H2) fades in and rises 16px between 6.0% and 14.8% of the section's scroll travel; beat 2 (body) between 33.5% and 42.3%. Body words then "ink" from white to <code>rgba(255, 255, 255, .75)</code> one by one (≈15 characters/second, 500ms per word). Whole screen fades out over the last 10% of its travel. Scrolling stirs the fluid background.
Visual assets	None (typography only).
Notes	On mobile the line break moves: "For 15 years, we / helped build / YouTube from / inside Google." (44px, natural wrap) and body "But what stayed with us were / the Creators / who brought it to life."

04 · Story 2 — "Students. / Homemakers. / Doctors. / Farmers."

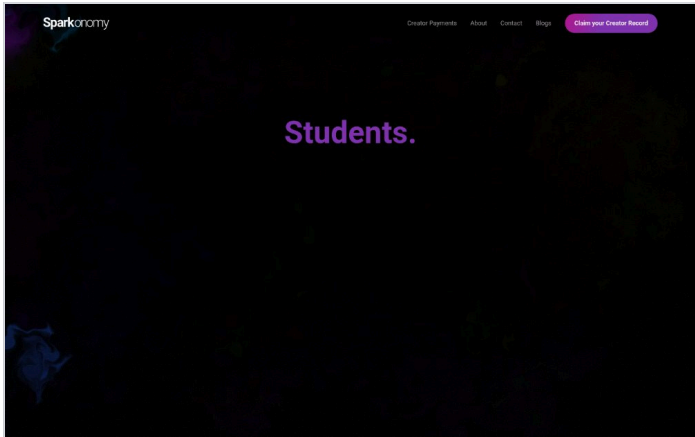

Desktop 1440

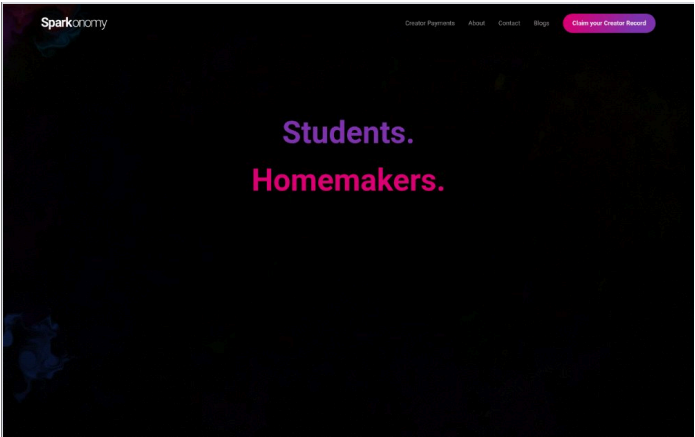

Mobile 390

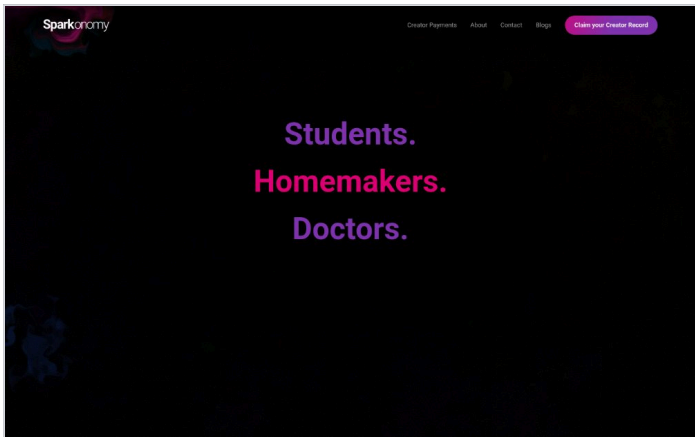

Position	4 of 11 · desktop scroll 2,295–6,075px · beat stops at 2,683, 3,086, 3,489, 3,892, 4,294px
DOM anchor	<code>section#people</code>
Purpose	Shows who Creators are — ordinary people from every walk of life who built a living on camera.
Layout	Pinned screen, 420svh (3,780px desktop), overlapping the previous screen by <code>margin-top: -100svh</code> . 5 beats: four stacked block lines inside one H2 (64px, <code>line-height: 1.55</code> = 99.2px desktop; 44px/74.8px mobile) then a body line (28.8px desktop / 20px mobile).
Background	Transparent over the fluid canvas + vignette.
CTA	None
Interaction	Each word-line appears on its own beat (windows start at 6.0%, 20.0%, 34.0%, 48.0%, 62.0% of travel, each 4.5% long); body words ink to white/75. In the automatic tour these beats glide 500ms apart (<code>data-tour-beat-ms="500"</code>).
Visual assets	None.
Notes	Alternating colours: Students. <code>#8134AF</code> (violet), Homemakers. <code>#DE0075</code> (magenta), Doctors. <code>#8134AF</code> , Farmers. <code>#DE0075</code> .

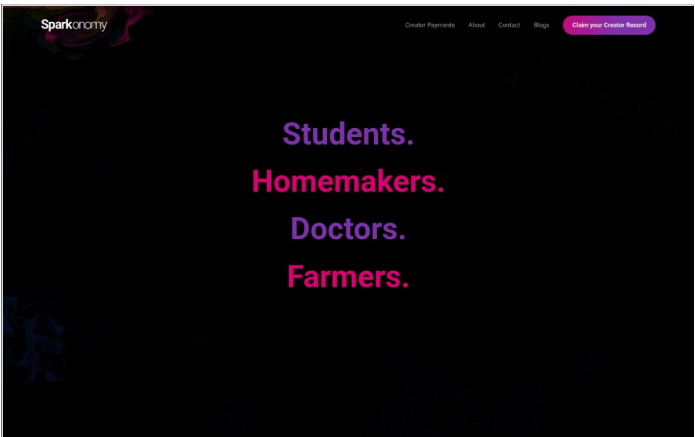

Beat 1 of 5

Beat 2 of 5

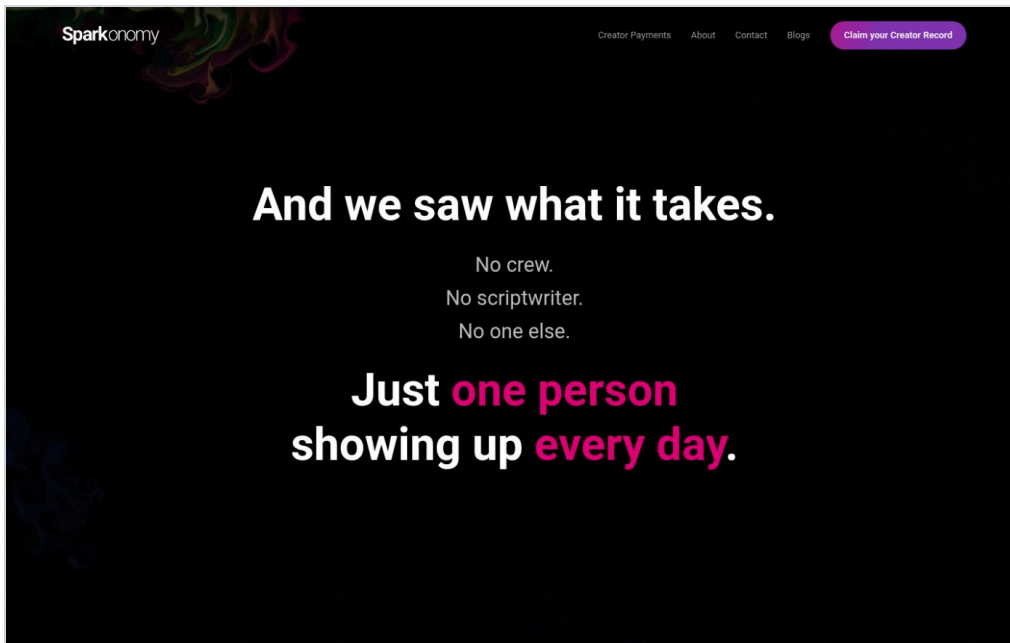

Beat 3 of 5

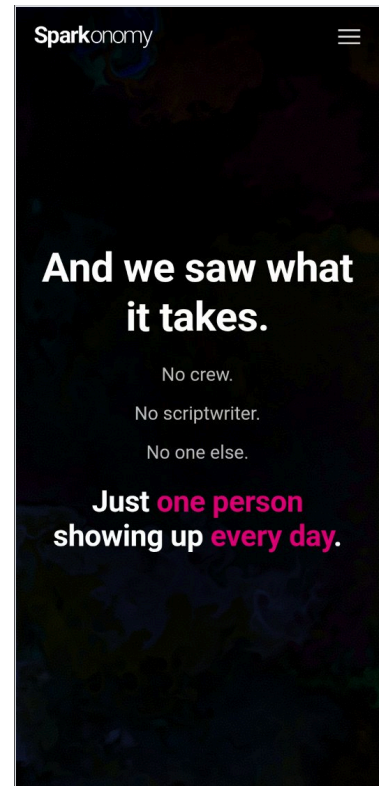

Beat 4 of 5

05 · Story 3 — "And we saw what it takes."

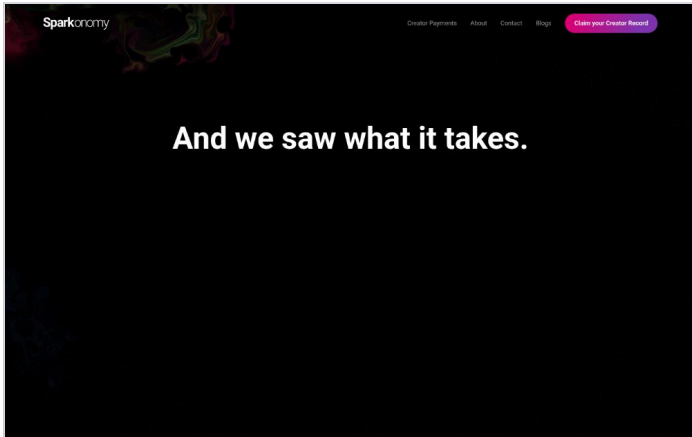

Desktop 1440

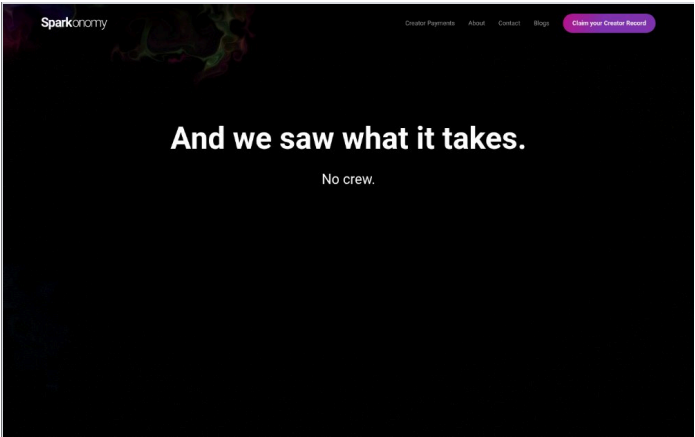

Mobile 390

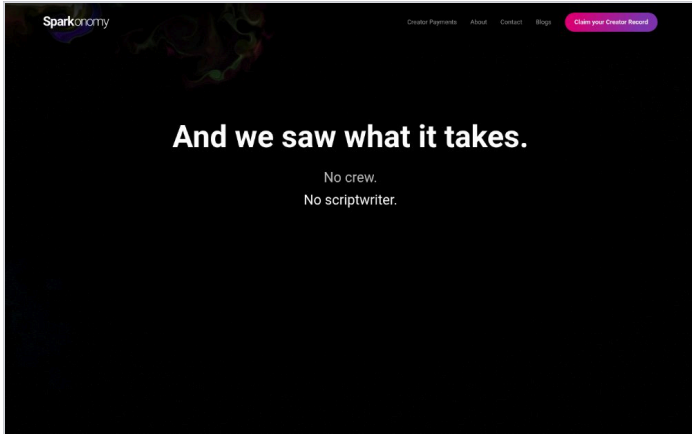

Position	5 of 11 · desktop scroll 5,175–8,955px · beat stops at 5,563, 5,966, 6,369, 6,772, 7,174px
DOM anchor	<code>section#reality</code>
Purpose	Empathy for the solo Creator: no crew, no scriptwriter, no one else — just one person showing up every day.
Layout	Pinned screen, 420svh, <code>margin-top: -100svh</code> . 5 beats: H2 (64px), three 28.8px lines ("No crew." / "No scriptwriter." / "No one else.", <code>space-y 4px desktop / 12px mobile</code> , white 100%), then a 64px bold payoff (32px/36.8px mobile, <code>margin-top: 24px</code>).
Background	Transparent over the fluid canvas + vignette.
CTA	None
Interaction	Mode "soften": as each new beat enters, the previous middle line fades to 75% opacity. In the payoff, "one person" is magenta immediately; "every day" starts white and transitions to magenta (<code>color 600ms ease-in-out</code> , delays 900ms and 1,200ms after the line is fully revealed). Tour glide between these beats: 1,000ms.
Visual assets	None.
Notes	Highlight colour <code>#DE0075</code> on "one person" and "every day".

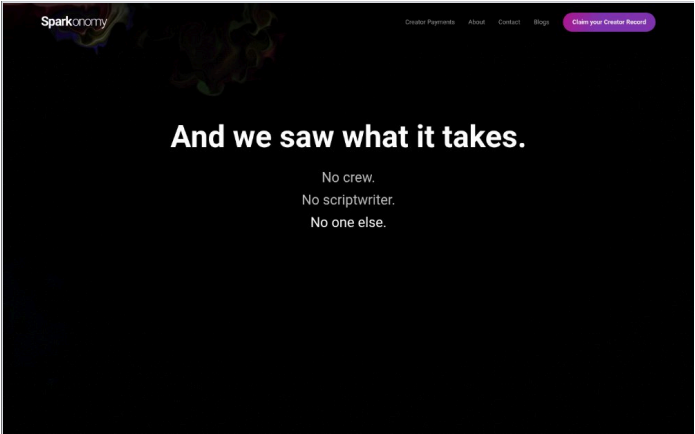

Beat 1 of 5

Beat 2 of 5

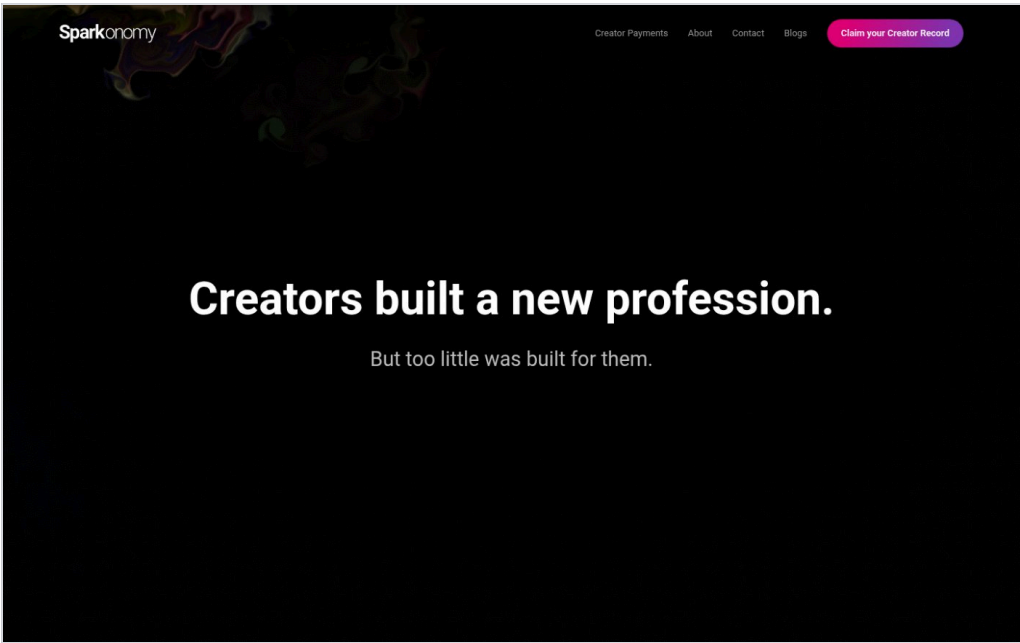

Beat 3 of 5

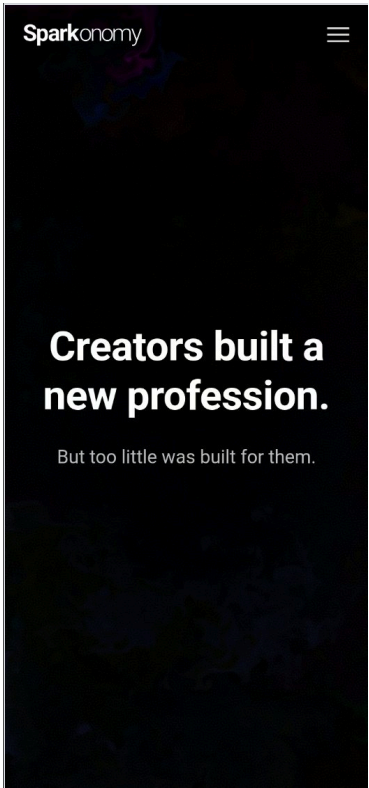

Beat 4 of 5

06 · Story 4 — "Creators built a new profession."

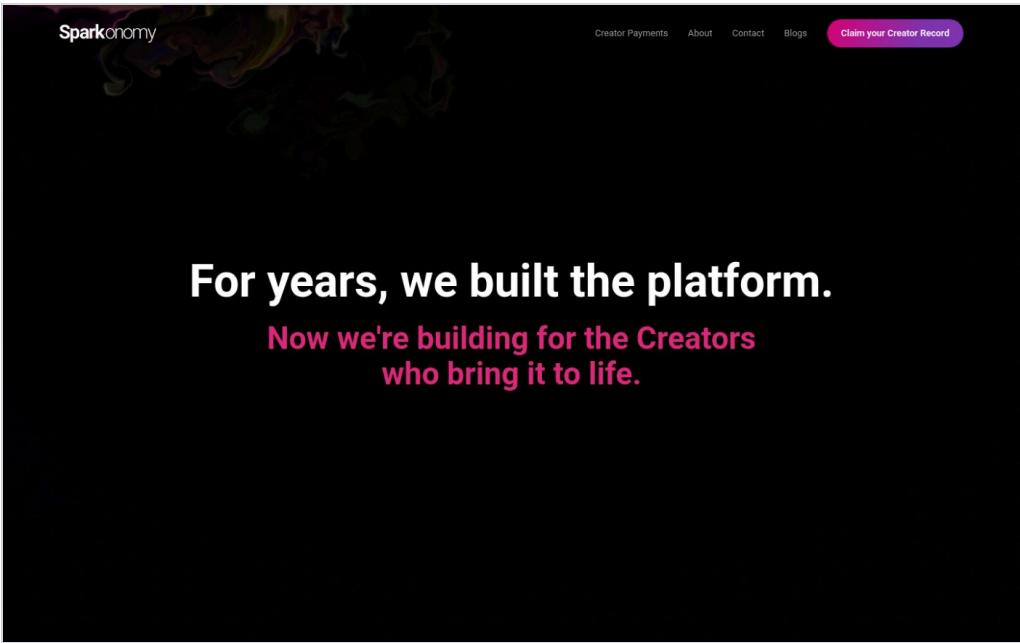

Desktop 1440

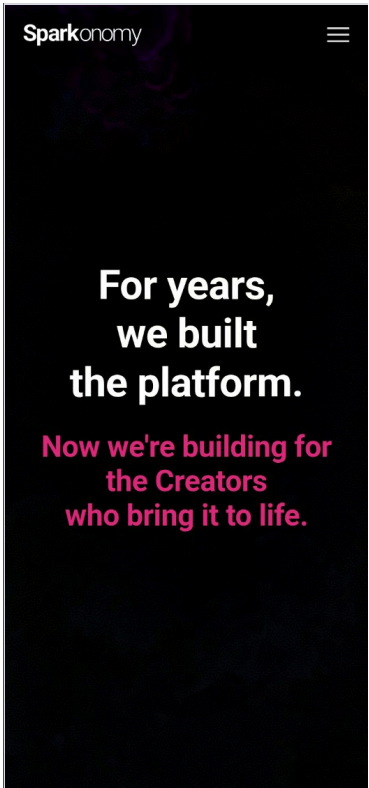

Mobile 390

Position	6 of 11 · desktop scroll 8,055–10,350px · beat stops at 8,303, 8,687px
DOM anchor	section#Love
Purpose	States the problem: Creators built a profession, but too little was built for them.
Layout	Pinned screen, 255svh, margin-top: -100svh . 2 beats: H2 64px + body 28.8px (margin-top: 24px).
Background	Transparent over the fluid canvas + vignette.
CTA	None
Interaction	Same beat reveal (opacity 0 → 1, translateY 16px → 0) and word-ink as Story 1.
Visual assets	None.
Notes	—

07 · Story 5 — "For years, we built the platform."

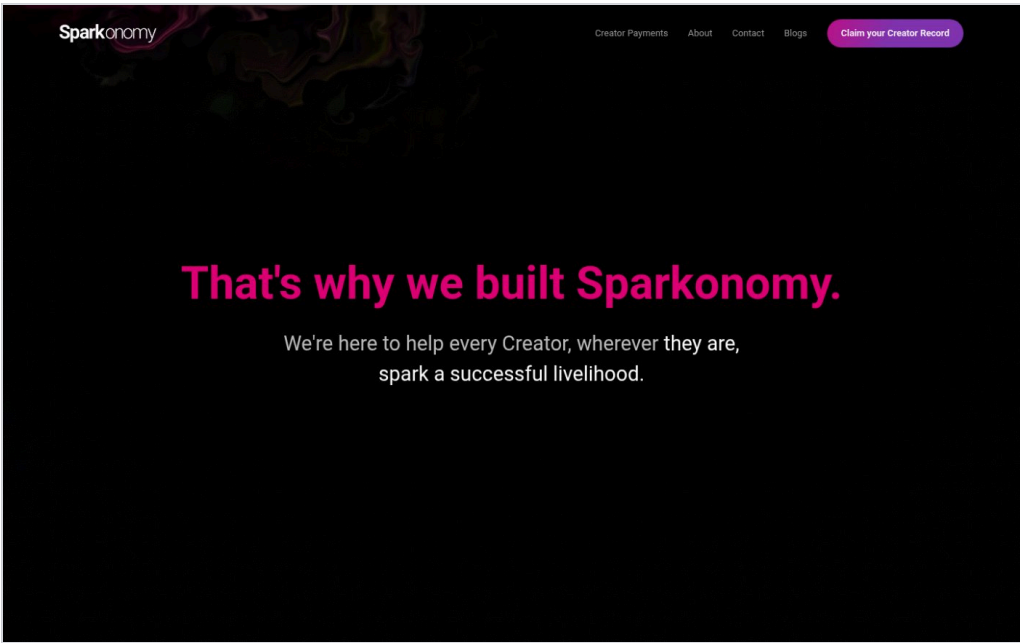

Desktop 1440

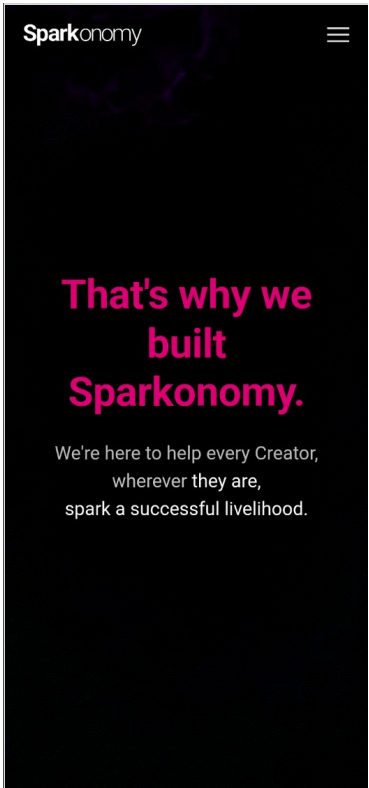

Mobile 390

Position	7 of 11 · desktop scroll 9,450–11,745px · beat stops at 9,698, 10,082px
DOM anchor	section#turn
Purpose	The turn: from building the platform (YouTube) to building for the Creators.
Layout	Pinned screen, 255svh, margin-top: -100svh . 2 beats: H2 64px; then a 43.92px bold line (clamp(2rem,3.05vw,2.75rem); 32px mobile), max-width: 52rem, margin-top: 16px (24px mobile).
Background	Transparent over the fluid canvas + vignette.
CTA	None
Interaction	Beat reveal as above.
Visual assets	None.
Notes	Second line coloured #DD2A7B (pink). Mobile H2 breaks "For years, / we built / the platform."

08 · Story 6 — "That's why we built Sparkonomy."

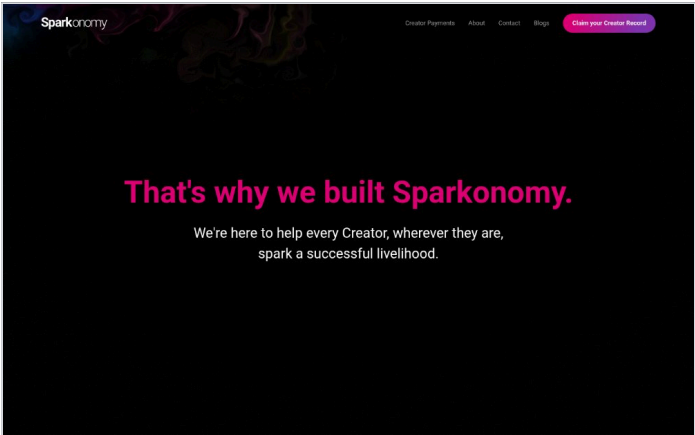

Desktop 1440

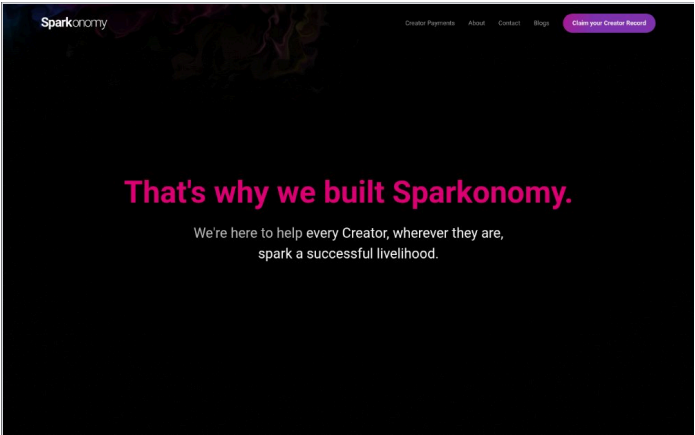

Mobile 390

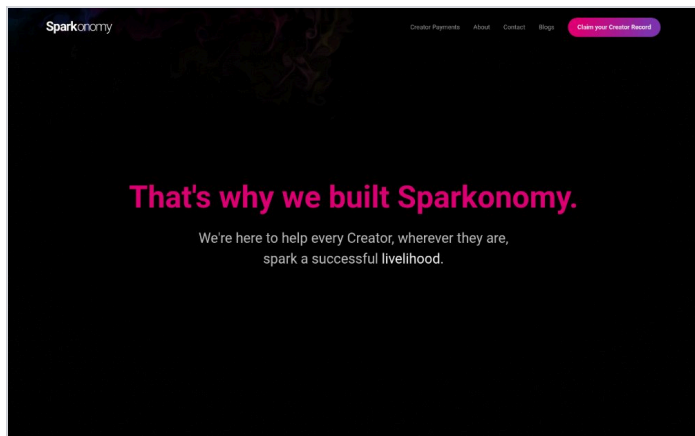

Position	8 of 11 · desktop scroll 10,845–12,645px · beat stops at 11,038px
DOM anchor	section#mission
Purpose	Mission statement.
Layout	Pinned screen, 200svh, margin-top: -100svh . 1 beat containing H2 (64px) + body (28.8px).
Background	Transparent over the fluid canvas + vignette.
CTA	None
Interaction	After the beat appears, the H2 words ink from white to magenta #DE0075 word by word, then the body words ink from white to white/75 (body starts when the heading's ink timeline ends).
Visual assets	None.
Notes	The heading ends fully magenta; captured mid-transition in _motion/word-ink-mission-*.png.

Word ink, ~0.7s

~4.3s

09 · Creator Record — Open Creator Graph product demo

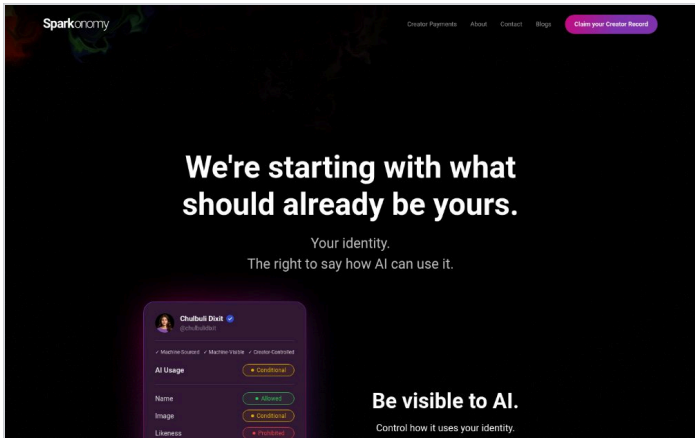

Desktop 1440

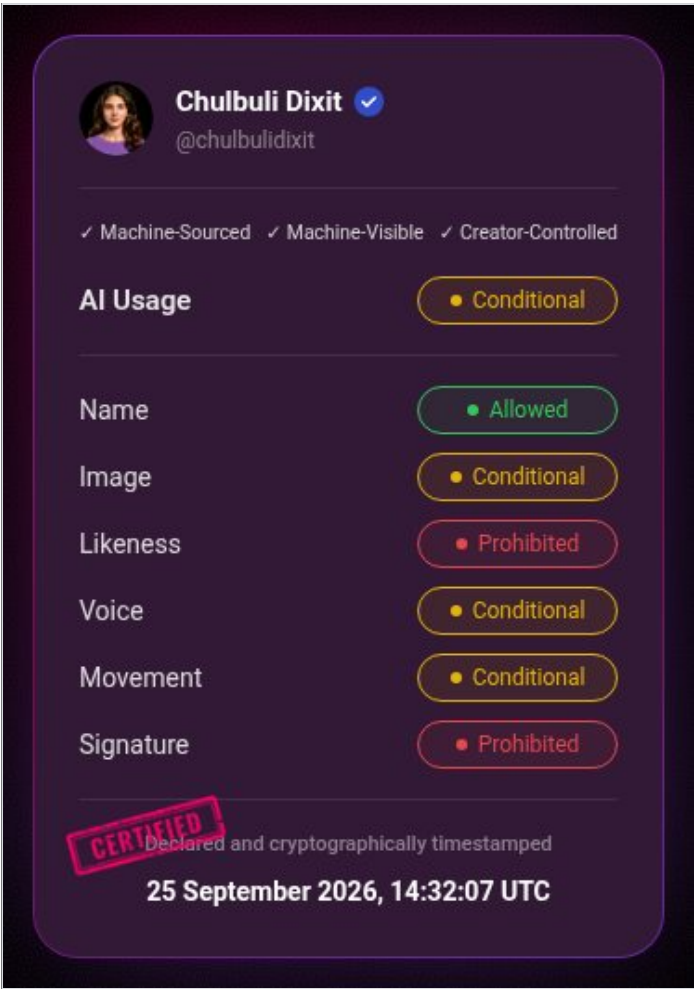

Mobile 390

Position	9 of 11 · desktop scroll 12,645–13,898px
DOM anchor	<code>section#ocg</code>
Purpose	Product proof: an example "Creator Record" (identity + AI-usage consent per facet, cryptographically timestamped and certified) next to the value proposition and the second primary CTA.
Layout	<code>section#ocg</code> is NOT pinned: normal flow, min-height: 100svh, padding: 96px 24px. Content max-width: 54rem (864px; 40rem mobile). H2 (2 lines, 64px) + body (28.8px). Below (margin-top: 56px): desktop/tablet ≥768px a 2-column grid <code>grid-template-columns: 21.25rem 1fr</code> ; gap: 56px; align-items: center — card (340px) left, H3 + pitch + CTA right; the grid is position: sticky with top = max(88px, (100vh - height)/2) (348px at 900px tall) plus a 60svh spacer, so it holds in the middle while the heading scrolls away. Mobile: single column, card (max 25rem) then H3 + CTA.
Background	Transparent over the fluid canvas + vignette. Card: 1px gradient border <code>linear-gradient(160deg, rgba(151,71,255,.7), rgba(222,0,117,.5) 55%, rgba(151,71,255,.6))</code> , radius 24px; inner panel <code>#321935</code> , radius 23px, padding: 24px; blurred glow behind (<code>linear-gradient(133.52deg, #DE0075 5.08%, #8134AF 56.74%)</code> , blur(40px), opacity .6).
CTA	Claim your free Creator Record → https://creatorgraph.sparkonomy.com (new tab).
Interaction	- Card is lazy-mounted when within 300px of the viewport (200px placeholder). - Desktop/tablet: card always expanded. Mobile: shows only header + claims + "AI Usage" summary until the H2 scrolls under the header (bottom < 72px), then expands (height animation 0.9s, ease <code>cubic-bezier(.22,1,.36,1)</code>; collapses in 0.54s when scrolled back past 160px); facet rows stagger in (0.08s apart, start delay 0.12s, each 0.45s: opacity 0 → 1, y 8 → 0); "Certified" stamp fades in (0.4s, delay 0.63s). - CTA sweep animation paused while the CTA is off-screen; hover opacity .9.
Visual assets	Avatar /CD.png (40×40 round, rendered from 183×181 original), verified tick inline SVG 16×16 (<code>#334CCA</code> circle + white check), "CERTIFIED" stamp /Certified-1.png (rendered 112×70; original 3238×2018), stance pills.
Notes	Stance colours: Allowed <code>#34C759</code>, Conditional <code>#E5B607</code>, Prohibited <code>#E5484D</code> — text, 1px border and an 8% tint fill (<code>...14</code> hex alpha); 108px-wide pills with a 6px dot.

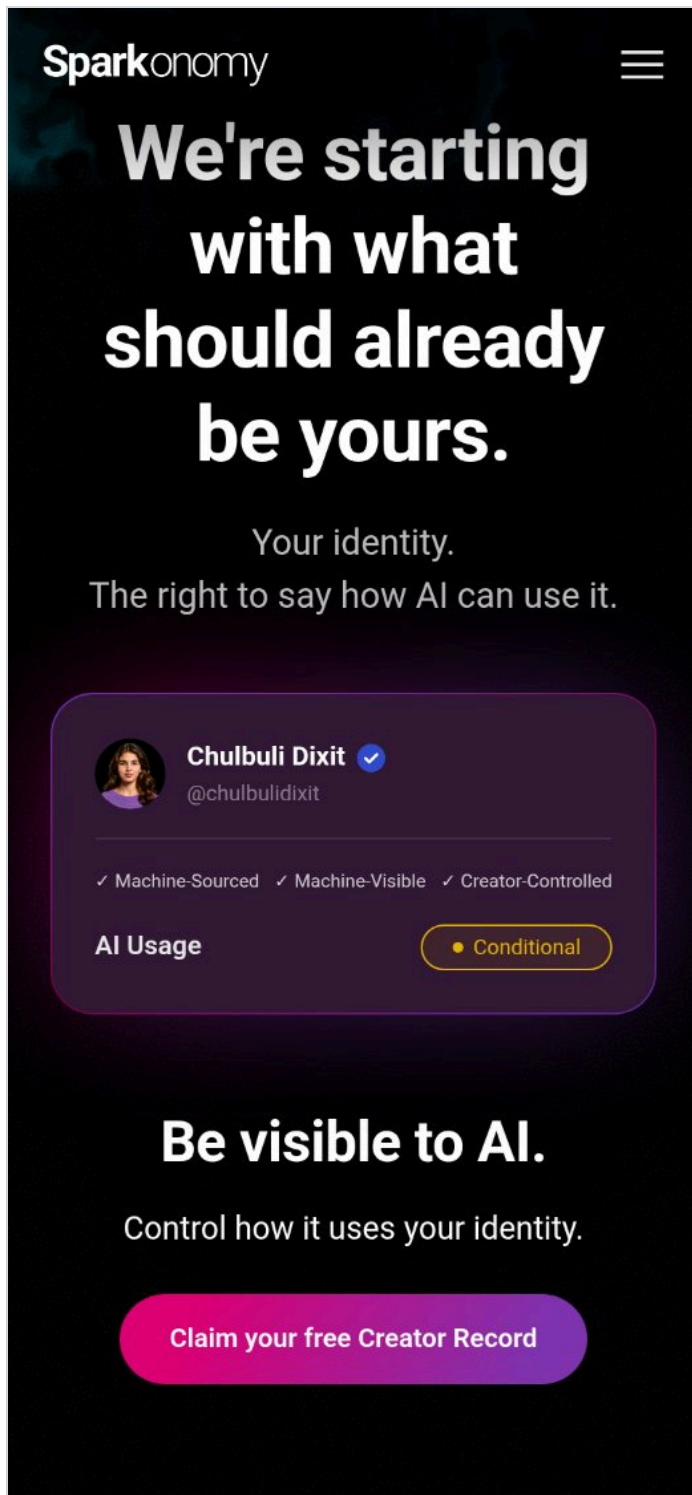

- The bundled data also defines a "not declared" stance (white) and a 5-step "Day 1 ... Day 30" narrative that is not rendered on the homepage.
- Example persona "Chulbuli Dixit" (@chulbulidixit) is illustrative demo content.

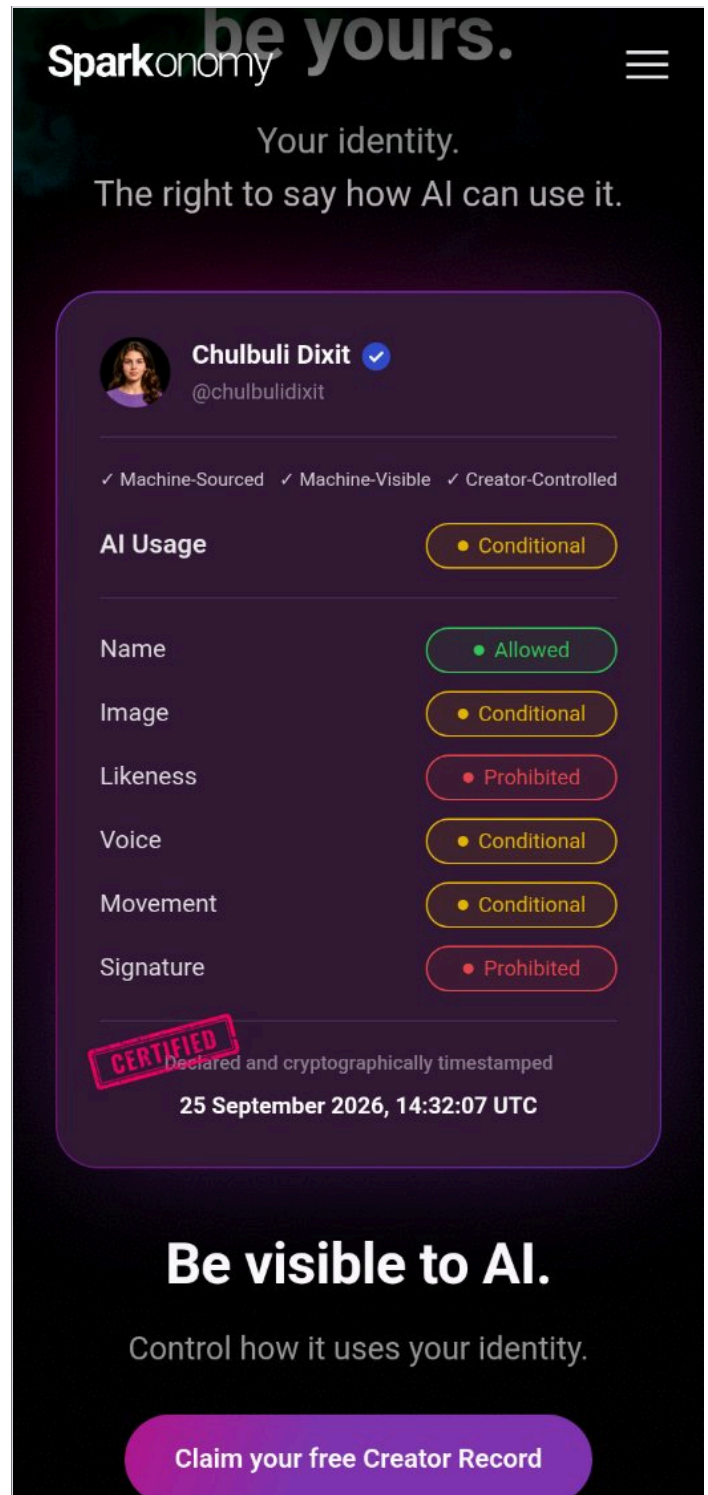

Desktop: section heading entering

Creator Record card (desktop crop)

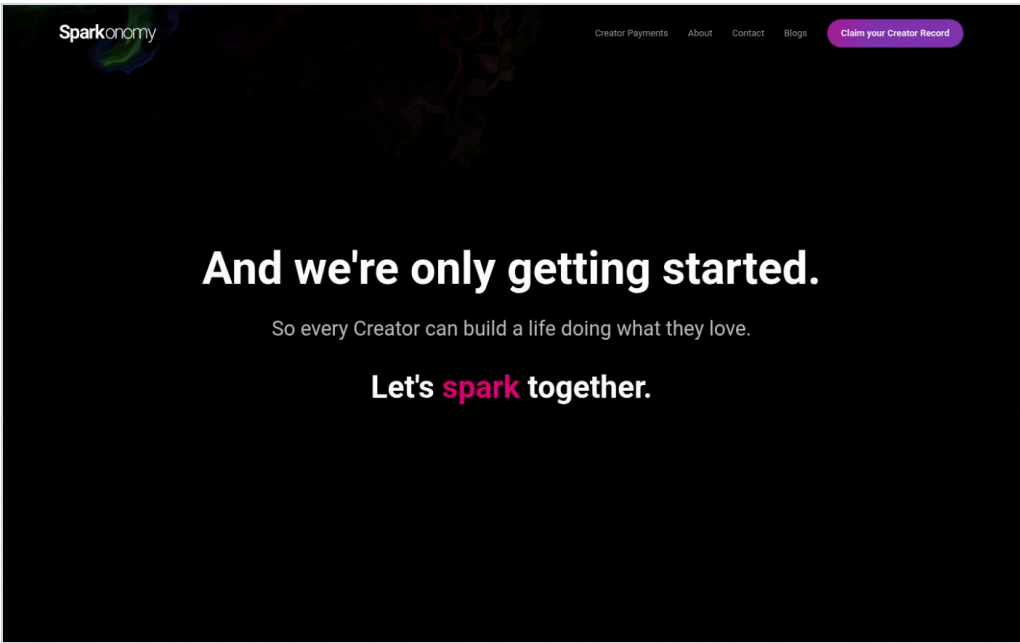

Mobile: card collapsed (summary only)

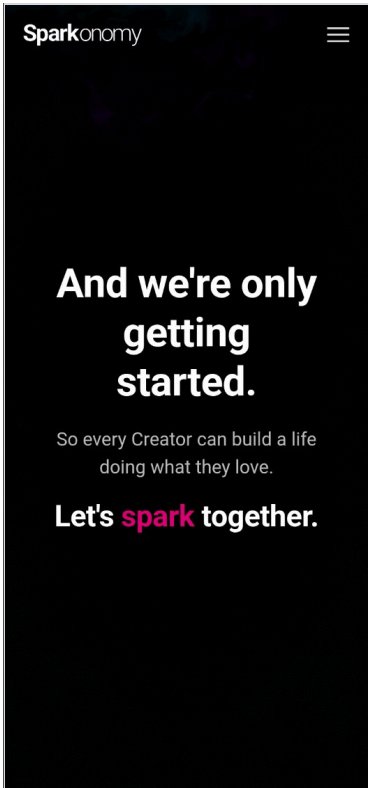

Mobile: card expanded after heading scrolls away

10 · Closing — "And we're only getting started."

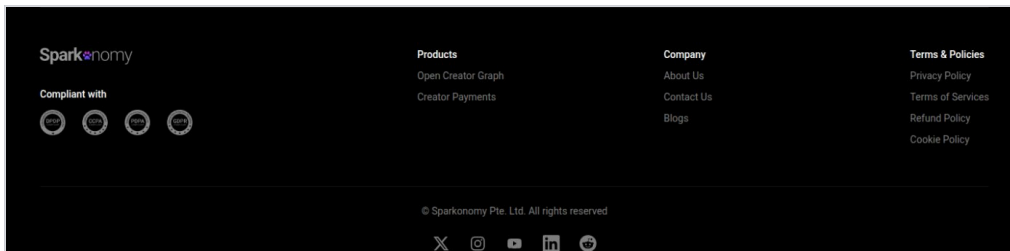

Desktop 1440

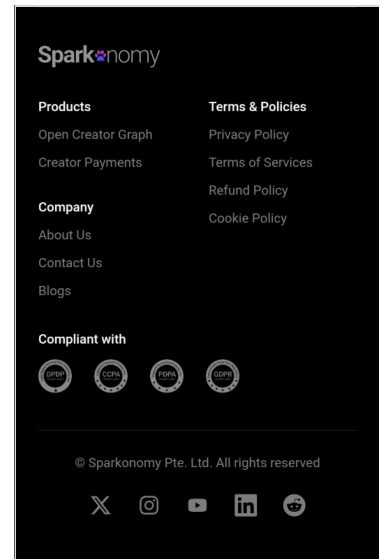

Mobile 390

Position	10 of 11 · desktop scroll 13,898–16,688px · beat stops at 14,194, 14,588, 14,983px
DOM anchor	section#future
Purpose	Forward-looking sign-off and brand sign line "Let's spark together."
Layout	Pinned screen, 310svh (no negative overlap, it follows the flow section). 3 beats: H2 64px (max-width: 18rem on mobile), body 28.8px (margin-top: 24px), sign line 43.92px bold (margin-top: 36px; 32px mobile).
Background	Transparent over the fluid canvas + vignette.
CTA	None (no CTA in the closing screen; the header CTA remains visible).
Interaction	Beat reveal + word ink as other story screens. This screen does not fade out at the end (it hands over to the footer).
Visual assets	None.
Notes	"spark" coloured #DE0075.

11 · Footer

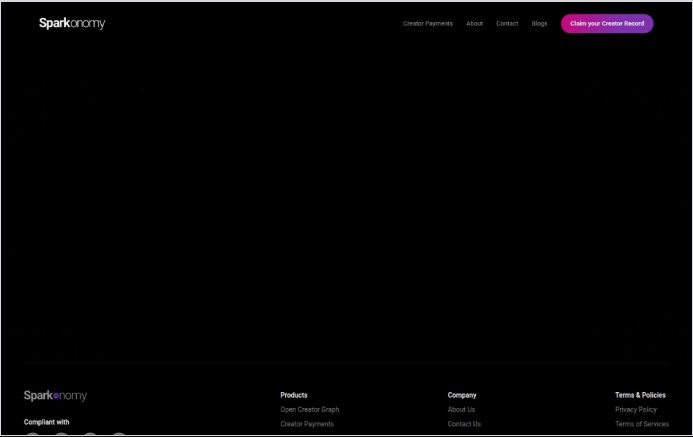

Desktop 1440

Mobile 390

Position	11 of 11 · desktop scroll 16,688–17,082px
DOM anchor	footer
Purpose	Secondary navigation (products, company, legal), compliance badges, copyright and social profiles.
Layout	<code><footer></code> background: #000; padding: 0 40px 48px (24px sides mobile), position: relative; z-index: 10. Inner max-width: 84rem, border-top: 1px solid rgba(255,255,255,.1), padding-top: 56px (40px mobile). Desktop grid <code>grid-template-columns: 1.6fr 1fr 1fr auto;</code> gap: 40px → [wordmark + "Compliant with" badges] [Products] [Company] [Terms & Policies]. Then a 1px rgba(255,255,255,.1) divider (margin-top: 56px) and a centred column (gap: 24px): copyright, then 5 social icons (24×24, gap: 28px). Mobile: wordmark, then a 2-column grid (Products + Company stacked left, Terms & Policies right), then "Compliant with", divider, copyright, icons.
Background	Solid #000000 (covers the fluid canvas).
CTA	None (text links only).
Interaction	Links and social icons <code>rgba(255,255,255,.5) → white on hover (transition: color .15s cubic-bezier(.4,0,.2,1))</code> . "Cookie Policy" is a <code><button class="cky-banner-element"></code> that re-opens the CookieYes banner. External links open in a new tab (<code>rel="noopener"</code> for Open Creator Graph, <code>rel="noopener noreferrer"</code> for social).
Visual assets	logo_header_gray.png (523×96, rendered 131×24; grey wordmark with a purple paw-print "o"), compliance badges DPDP/CCPA/PDPA/GDPR (white PNG, 36×36, opacity .55), 5 inline SVG social icons (X, Instagram, YouTube, LinkedIn, Reddit; <code>fill: currentColor</code>).
Notes	Labels: column headings 14px/20px weight 500 white; links 14px/20px weight 400 white/50; copyright 14px white/50.

Desktop viewport at the end of the page

08 Exact copy

For each section: the copy as structured on the page (verbatim; line breaks as rendered on desktop; source vs. displayed case noted), followed by every captured text node in DOM order with its state and computed style, and the links in that section.

09 Visual assets

Assets were downloaded from their **original source URLs** (for `/_next/image?url=...` optimiser URLs the decoded `url` path was fetched, e.g. `/logos/Meta_White.png`, so files are the untouched originals rather than resized AVIFs). Inline SVGs were serialised from the DOM. Naming and categories are set in `data/raw/asset-overrides.json`.

- **logos/** — brand wordmarks, favicons, OCG mark, partner logos, compliance badges, CookieYes wordmark (third-party).
- **images/** — Creator avatar (demo persona) and the Open Graph share image.
- **icons/** — hamburger PNG, chevron, verified tick, 5 social icons, CookieYes close icon (third-party).
- **illustrations/** — "CERTIFIED" stamp graphic.
- **videos/** — none: the homepage has no `<video>`, Lottie or GIF. All motion is CSS/JS/WebGL.
- **backgrounds/** — none as files: the background is a real-time WebGL simulation (no image) plus CSS gradients (vignette, header scrim, card glows), documented in the Colour and Animation chapters.

Excluded: Google Tag Manager tracking pixel (`/td?id=GTM-...`) and analytics beacons.

Category	Files	Folder
logos	16	assets/logos/
images	2	assets/images/
icons	9	assets/icons/
illustrations	1	assets/illustrations/
videos	0	assets/videos/
backgrounds	0	assets/backgrounds/

NON-FILE VISUALS

Visual	Implementation
Fluid ink background	WebGL2 canvas simulation (no file) — Animations chapter
Vignette, header scrim, card glows, gradient borders	CSS gradients / masks — Colour palette chapter
Hero wordmark	Live text (10 coloured spans)
Stance pills, NEW badge	HTML/CSS

10 Logo inventory

- **Sparkonomy wordmark** — two-weight logotype "Sparkonomy" (bold "Spark", light "onomy"). Header version white (`/logos/logo_header_white.png`, 991×188 PNG, rendered 26px tall); footer version grey with a purple paw-print/spark mark replacing the "o" (`/logos/logo_header_gray.png`, 523×96, rendered 24px tall). Both are raster PNGs (no SVG logo on the page).
- **Hero wordmark** is live text, not an image (H1 with per-letter gradient colours).
- **Favicon / app icons** — grey "S" on a black-to-purple circle: 192×192, 512×512, apple-touch 180×180.
- **JSON-LD logo** `/sparkonomy.png` — glowing indigo "S" on black (663×501; declared 512×512); not rendered on the page.
- **Open Creator Graph mark** — circular network/constellation "S" in magenta/purple on white lines (`/logos/ocg-mark.webp`, 160×160).
- **Partner logos** (white, transparent PNG, all labelled as program/affiliation badges): "Built with Meta", "Developed with YouTube", "Google for Startups", "Gemini Early Access Program".
- **Compliance badges** (white circular seals): DPDP (India Digital Personal Data Protection Act), CCPA (California Consumer Privacy Act), PDPA (Singapore Personal Data Protection Act), GDPR (General Data Protection Regulation). The PDPA original is 2048×2048 while the others are 160×160.
- **Third-party**: CookieYes wordmark (inline SVG in the cookie banner).
- Originals were downloaded from the un-optimised source paths (the page itself serves them through `/_next/image` as AVIF).

 Sparkonomy wordmark (header, white) <code>logo-sparkonomy-wordmark-white.png</code> · PNG · 991×188 (shown 137×26) Primary brand wordmark in the fixed header (links to /). Rendered 137×26 desktop, 24px tall mobile.	 Partner logo: Built with Meta <code>logo-partner-meta-built-with-meta.png</code> · PNG · 452×160 "Built with Meta" affiliation logo — hero marquee (36px tall, opacity .75) and mobile menu "Built with" row.	 Partner logo: Developed with YouTube <code>logo-partner-developed-with-youtube.png</code> · PNG · 420×160 "Developed with YouTube" affiliation logo — hero marquee and mobile menu.
 Partner logo: Google for Startups <code>logo-partner-google-for-startups.png</code> · PNG · 312×160 "Google for Startups" programme logo — hero marquee and mobile menu.	 Partner logo: Gemini Early Access Program <code>logo-partner-gemini-early-access.png</code> · PNG · 452×160 "Gemini Early Access Program" logo — hero marquee and mobile menu.	 Compliance badge: DPDP <code>logo-compliance-dpdp.png</code> · PNG · 160×160 DPDP (India) compliance seal — footer "Compliant with" (36×36, opacity .55) and mobile menu.
 Compliance badge: CCPA <code>logo-compliance-ccpa.png</code> · PNG · 160×160 CCPA (California) compliance seal — footer and mobile menu.	 Compliance badge: PDPA <code>logo-compliance-pdpa.png</code> · PNG · 2048×2048 PDPA (Singapore) compliance seal — footer and mobile menu (original is 2048×2048).	 Compliance badge: GDPR <code>logo-compliance-gdpr.png</code> · PNG · 160×160 GDPR (EU) compliance seal — footer and mobile menu.

Open Creator Graph mark (hero launch card)
`logo-open-creator-graph-mark.webp`
· WEBP · 160×160 (shown 80×80)
Open Creator Graph product mark at the top of the hero launch card (80×80 desktop, 72×72 mobile).

Sparkonomy

Sparkonomy wordmark (footer, grey/purple)
`logo-sparkonomy-wordmark-footer.png` · PNG · 523×96 (shown 131×24)
Footer wordmark (grey with purple paw-print "o"), 131×24.

Favicon 192×192
`favicon-192x192.png` · PNG · 192×192
Browser favicon (`<link rel="icon" sizes="192x192">`).

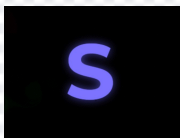

Favicon 512×512
`favicon-512x512.png` · PNG · 512×512
Large favicon / PWA-size icon (`<link rel="icon" sizes="512x512">`).

Apple touch icon 180×180
`apple-touch-icon-180x180.png` · PNG · 180×180
iOS home-screen icon (``apple-touch-icon``).

CookieYes

Third-party: CookieYes wordmark ("Powered by" in cookie banner)
`logo-thirdparty-cookieyes.svg` · SVG · 78×13 (shown 78×13)
Third-party: CookieYes wordmark in the banner's "Powered by" line.

Organization logo referenced by JSON-LD (not rendered)
`logo-sparkonomy-schema-512.png` · PNG · 663×501
Organization logo referenced only by JSON-LD (not rendered); actual size 663×501 although declared 512×512.

11 Image inventory

IMAGES

Example Creator avatar (Creator Record card)
`image-creator-avatar-chulbuli-dixit.png` · PNG · 183×181 (shown 40×40)
Avatar of the example Creator "Chulbuli Dixit" on the Creator Record card (40×40 circle).

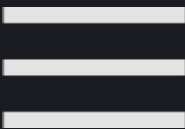

Open Graph / Twitter share image
`image-og-home-v2.png` · PNG · 1200×630
Social share image for og:image and twitter:image (1200×630, alt "Sparkonomy - AI Platform for Creators & Influencers").

ILLUSTRATIONS

"Certified" rubber-stamp graphic (Creator Record card)
`illustration-certified-stamp.png` · PNG · 3238×2018 (shown 112×70)
"CERTIFIED" rubber-stamp graphic overlapping the bottom-left of the Creator Record card (112×70); fades in after the card expands.

ICONS

Hamburger menu icon (mobile header)
`icon-hamburger-menu.png` · PNG · 92×60
Mobile (<768px) menu toggle icon inside the 32×32 header button.

Chevron under READ OUR STORY
`icon-chevron-down-read-our-story.svg` · SVG · 14×8 (shown 14×8)
Down chevron under the "READ OUR STORY" scroll cue.

Verified tick next to Creator name
`icon-verified-badge.svg` · SVG · 16×16 (shown 16×16)
Blue verified tick after the Creator name on the record card.

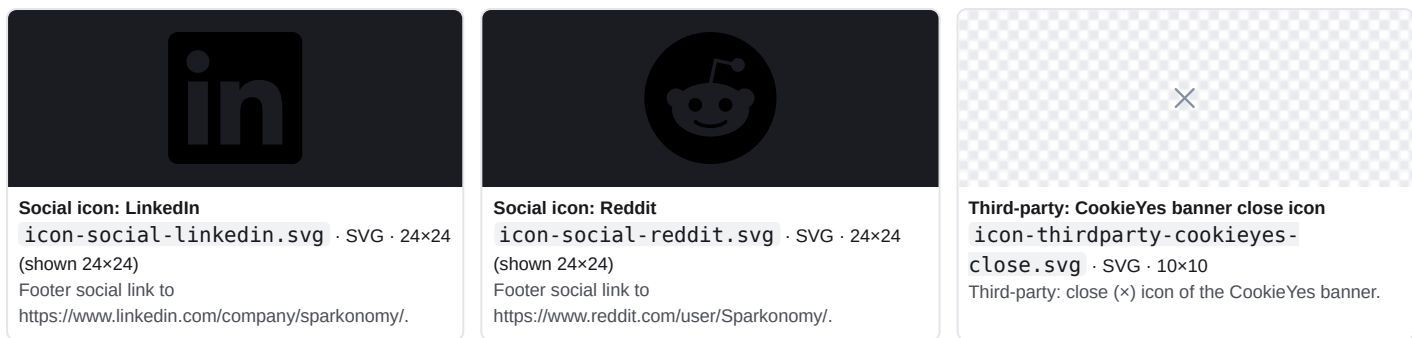

Social icon: X
`icon-social-x.svg` · SVG · 24×24 (shown 24×24)
Footer social link to <https://x.com/SparkonomySays>.

Social icon: Instagram
`icon-social-instagram.svg` · SVG · 24×24 (shown 24×24)
Footer social link to <https://www.instagram.com/sparkonomy.official/>.

Social icon: YouTube
`icon-social-youtube.svg` · SVG · 24×24 (shown 24×24)
Footer social link to <https://www.youtube.com/@Sparkonomy.official>.

Social icon: LinkedIn
`icon-social-linkedin.svg` · SVG · 24×24
(shown 24×24)
Footer social link to
<https://www.linkedin.com/company/sparkonomy/>.

Social icon: Reddit
`icon-social-reddit.svg` · SVG · 24×24
(shown 24×24)
Footer social link to
<https://www.reddit.com/user/Sparkonomy/>.

Third-party: CookieYes banner close icon
`icon-thirdparty-cookieyes-close.svg` · SVG · 10×10
Third-party: close (X) icon of the CookieYes banner.

VIDEOS / ANIMATIONS / BACKGROUNDS

No video, Lottie, GIF or background-image files on the homepage. The animated background is a real-time WebGL simulation (see Animations).

12 Typography

Font families

- **Roboto** (variable, weights 100–900) — the only face used on the homepage. Self-hosted through `next/font`:
`/_next/static/media/roboto_latin_wght-s.p.4075f395.woff2` (67,264 bytes, WOFF2, `font-display: swap`, preloaded).
CSS family name `roboto`, applied on `<body>` via class `roboto_51c32070-module__YpxGXa__className`.
- Fallback metric-matched face "**roboto Fallback**" = `local(Arial)` with `ascent-override: 92.43%`; `descent-override: 24.32%`; `line-gap-override: 0%`; `size-adjust: 100.37%` (prevents layout shift).
- Also declared but **not used on the homepage**: `robotoTool`, `robotoBlog` (same Roboto file, aliases for other pages) and **Solitreo 400** (`solitreo_latin_400-s.p.8dc56742.woff2`, 25,944 bytes) — preloaded on the homepage but never rendered (`document.fonts` status "unloaded").
- Weights in use: 400, 500, 600, 700. No italics. Text is `-webkit-font-smoothing: antialiased` (Tailwind antialiased on the root wrapper).

Behaviour

- Fluid sizes with `clamp()` above 768px (story headline `clamp(2.75rem, 4.45vw, 4rem)`, body `clamp(1.25rem, 2vw, 1.8rem)`, sub-headline `clamp(2rem, 3.05vw, 2.75rem)`); fixed sizes below 768px.
- Orphan control: JS "glue" spans (`data-glue`) keep the last two words of each line together (`white-space: nowrap`) and are re-balanced by a `ResizeObserver`.
- Uppercase is applied only with CSS `text-transform` (source copy is sentence case).

13 Colour palette

	Name	HE X	RGB	Usage
	Black (canvas)	#000000	rgb(0, 0, 0)	Page/body background (<code>bg-black</code>), fluid-simulation base colour, footer, mobile menu panel, <code>theme-color</code> meta. Vignette uses black at 62%/34% opacity; header scrim black at 75%/35%.
	White	#FFFFFF	rgb(255, 255, 255)	All headlines, CTA labels, card name, starting colour of the word-ink effect. Opacity steps in use: 90% tagline, 85% menu links & card rows, 80% claims, 75% story body ink, 60% nav links & OCG pitch, 50% footer links/social/captions, 45% handle & stamp label, 35%/30% labels, 10% borders/dividers.
	Magenta (INK.magenta)	#DE0075	rgb(222, 0, 117)	Start of the CTA gradient (0–8%), card border gradient, highlighted words: "Homemakers.", "Farmers.", "one person", "every day", "spark", and the ink colour of "That's why we built Sparkonomy."
	Violet (INK.violet)	#8134AF	rgb(129, 52, 175)	End of the CTA gradient (45–100%), "Students." and "Doctors.", hero launch-card fill at 20% (<code>#8134AF33</code>), card glow.
	Pink (INK.pink)	#DD2A7B	rgb(221, 42, 123)	"NEW" badge background, "Now we're building for the Creators who bring it to life." line, start of the <code>--pink-to-purple</code> CSS token (<code>linear-gradient(162deg, #dd2a7b 4.78%, #9747ff 89.95%)</code>).
	Purple (INK.purple)	#9747FF	rgb(151, 71, 255)	Creator Record card border gradient (70%/60% alpha), end of <code>--pink-to-purple</code> token.
	Indigo (INK.indigo)	#6C63FF	rgb(108, 99, 255)	Wordmark pulse target colour and glow (<code>text-shadow: 0 0 10px #6c63ffb3</code>), READ OUR STORY glow.
	Wordmark ramp start	#7B6CF6	rgb(123, 108, 246)	First letter "S" of the hero wordmark (ramp → <code>#E89AD4</code> at 65% → <code>#F0EEFF</code>).
	Wordmark ramp mid	#E89AD4	rgb(232, 154, 212)	Ramp mid-stop (65%) of the wordmark letters.
	Wordmark ramp end	#F0EEFF	rgb(240, 238, 255)	Last letter "y" of the wordmark.
	Cue lilac	#C4BEFF	rgb(196, 190, 255)	Peak colour (80% alpha) of the READ OUR STORY pulse.
	Record plum	#321935	rgb(50, 25, 53)	Creator Record card inner background.
	Allowed green	#34C759	rgb(52, 199, 89)	"Allowed" stance pill (text, border, 8% fill).
	Conditional amber	#E5B607	rgb(229, 182, 7)	"Conditional" stance pill (text, border, 8% fill).
	Prohibited red	#E548D	rgb(229, 72, 77)	"Prohibited" stance pill (text, border, 8% fill).
	Verified blue	#334CCA	rgb(51, 76, 202)	Verified tick circle next to the Creator name.

	Name	HEX	RGB	Usage
	CookieYes button grey (third-party)	#6B7280	rgb(107, 114, 128)	Cookie banner "Reject All"/"Accept All" default background.
	CookieYes button hover (third-party)	#B81E66	rgb(184, 30, 102)	Cookie banner button hover background.

14 Buttons & CTAs

All buttons/CTAs share one visual language: a fully rounded **gradient pill** for conversion, and plain text for everything else. There is no secondary/outline button style and no visible focus ring styling beyond the browser default (Tailwind preflight; not customised — focus appearance otherwise **Unable to determine** without keyboard testing).

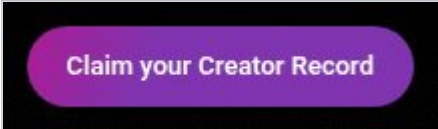

Gradient used by every pill CTA: `linear-gradient(110deg, #DE0075 0%, #DE0075 8%, #8134AF 45%, #8134AF 100%)`, `background-size: 200% 100%`, `initial background-position: 30% 0`, animated by `@keyframes cta-sweep { 0% { background-position: 60% 0 } to { background-position: 0 0 } }` over 3.5s ease-in-out, infinite, alternate (disabled with `prefers-reduced-motion`). Hover: `opacity: .9`, `transition: opacity .15s cubic-bezier(.4,0,.2,1)`. No border, no shadow. All pill CTAs link to <https://creatorgraph.sparkonomiy.com> in a new tab.

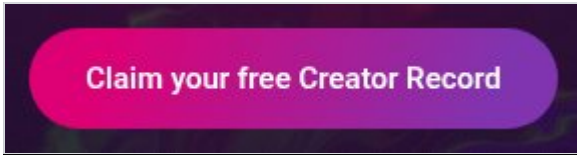

Header CTA — rest

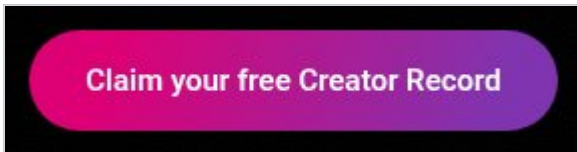

Header CTA — hover (opacity .9)

	
Name	Header CTA (primary pill, small)
Exact label	Claim your Creator Record
Destination	https://creatorgraph.sparkonomiy.com — <code>target="_blank" rel="noopener"</code>
Size	193 × 40 px
Padding	10px 20px
Typography	Roboto 600, 13px / 19.5px, #FFFFFF
Radius	9999px (pill)
Background	CTA gradient (see above), animated sweep
Hover	opacity 1 → 0.9 (150ms) — see <code>_components/btn-nav-cta-hover.png</code>
Locations	Header (≥768px); mobile menu (full-width variant, 15px, padding 14px 20px)

Name	Hero CTA (primary pill, large)
Exact label	Claim your free Creator Record
Destination	https://creatorgraph.sparkonomy.com — new tab
Size	263 × 51 px
Padding	14px 28px
Typography	Roboto 600, 15px / 22.5px, #FFFFFF
Radius	9999px
Background	CTA gradient, animated sweep
Hover	opacity 0.9
Locations	Hero launch card

Name	Creator Record CTA (primary pill, large)
Exact label	Claim your free Creator Record
Destination	https://creatorgraph.sparkonomy.com — new tab
Size	263 × 51 px
Padding	14px 28px
Typography	Roboto 600, 15px / 22.5px
Radius	9999px
Background	CTA gradient; sweep paused while off-screen (<code>data-offscreen</code>)
Hover	opacity 0.9
Locations	Creator Record section

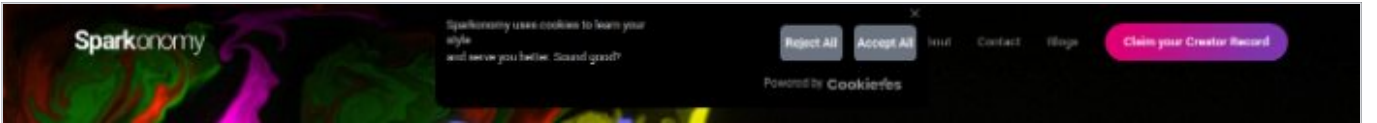

Name	Scroll cue (text button)
Exact label	READ OUR STORY (source "Read our story") + chevron
Destination	No URL — dispatches the <code>story:tour</code> event, which auto-scrolls through every story beat (with reduced motion: jumps to the end of the hero)
Size	133 × 32 px
Padding	0; chevron 14×8 SVG, gap 6px
Typography	Roboto 400, 12px / 18px, letter-spacing 0.22em (2.64px), uppercase
Radius	—
Background	none; colour #FFFFFF4D pulsing to #C4BEFFCC with indigo glow
Hover	No hover style
Locations	Bottom of hero; animation <code>scroll-cue 1.4s cubic-bezier(.33,0,.2,1) infinite (translateY 0 → 7px → 0) + cue-pulse 1.4s</code>

Name	Text links (nav)
Exact label	Creator Payments · About · Contact · Blogs
Destination	/creator/earn · /about · /contact · /blogs
Typography	13px/19.5px Roboto 400, rgba(255,255,255,.6)
Hover	colour → #FFFFFF, 150ms
Locations	Header

Name	Text links (footer)
Exact label	Open Creator Graph · Creator Payments · About Us · Contact Us · Blogs · Privacy Policy · Terms of Services · Refund Policy · Cookie Policy
Destination	see Footer chapter; "Cookie Policy" is a <button> opening CookieYes
Typography	14px/20px Roboto 400, rgba(255,255,255,.5)
Hover	colour → #FFFFFF, 150ms
Locations	Footer

Name	Icon links (social)
Exact label	aria-labels: X · Instagram · YouTube · LinkedIn · Reddit
Size	24 × 24 px icons, gap 28px
Typography	—
Hover	rgba(255,255,255,.5) → #FFFFFF, 150ms
Locations	Footer

Name	Hamburger / close button
Exact label	sr-only "Open menu" / "Close menu"
Size	32 × 32 px (icon 24px wide)
Hover	none
Locations	Header <768px

	
Name	Cookie banner buttons (CookieYes, third-party)
Exact label	Reject All · Accept All · × (aria-label "Close")
Size	≈66 × 38 px
Typography	Roboto 500, 13px / 13px, #FFFFFF
Radius	6px
Background	rgb(107,114,128)
Hover	background rgb(184,30,102) + filter brightness(.9)
Locations	CookieYes top bar

Name	Non-interactive pills (for reference)
Exact label	"NEW" badge; stance pills "Allowed" / "Conditional" / "Prohibited"
Size	NEW 45×19; stance 108×26
Typography	NEW 11px/700 uppercase .04em; stance 12px
Radius	9999px
Background	NEW #DD2A7B; stance: colour at 8% + 1px border in colour
Locations	Hero card; Creator Record card

15 Animations / interactions

Motion is central to this page. Sources: the page's own JS chunks (414c2cf9ce43ae7e.js story components, c75f5b915cd1ec52.js fluid wrapper, 4884221f851638c7.js fluid engine, 517217656e425c14.js content constants) and CSS (0c8365a30c76d7c2.css). All timings below are copied from that code; screenshots in screenshots/_motion/ show them in action. Everything honours prefers-reduced-motion: reduce (static gradient background instead of WebGL, screens become normal-flow sections, no beats/ink/marquee/sweep).

Scroll architecture

- Each story screen is a `<section data-tour-beats="N">` with `height: (100 + 55·N + 45)svh` — 2 beats → 255svh, 5 → 420svh, 1 → 200svh, 3 → 310svh — containing a `position: sticky; top: 0; height: 100svh` stage. Consecutive screens overlap by `margin-top: -100svh`.
- Scroll progress $p \in [0,1] = (\text{scrollTop} - \text{sectionTop}) / (\text{sectionHeight} - 100\text{svh})$, tracked with Framer Motion `useScroll / useTransform`.
- Beat windows: $n = (0.84 - 45/(55N + 45))/N$; beat i enters over $[0.06 + i·n, 0.06 + i·n + \min(0.32n, 0.14)]$ with smoothstep easing: `opacity 0→1, translateY 16px→0`. The whole stage fades out over $p 0.9 \rightarrow 1.0$.
- Measured beat stops at 1440×900 (scrollTop where each beat is fully in): roots 1,148 / 1,532; people 2,683 / 3,086 / 3,489 / 3,892 / 4,294; reality 5,563 / 5,966 / 6,369 / 6,772 / 7,174; love 8,303 / 8,687; turn 9,698 / 10,082; mission 11,038; future 14,194 / 14,588 / 14,983.

Name	WebGL fluid "ink" background
Where	Whole page (fixed layer <code>div.fixed.inset-0.z-0 > 100vw × 100lvh</code> container > <code><canvas></code> , WebGL2)
Trigger	Mounted on <code>requestIdleCallback</code> (timeout 1,500ms; 300ms fallback); runs continuously via <code>requestAnimationFrame</code>
Timing	Navier–Stokes-style simulation with the library defaults ("baseline" mode on the homepage): <code>simResolution 128, dyeResolution 1024, densityDissipation 1, velocityDissipation 0.2, pressure 0.8</code> (20 iterations), <code>curl 30, splatRadius 0.25, splatForce 6000</code> , shading on, colorful on (<code>colorUpdateSpeed 10, random hues</code>), <code>brightness 0.5, bloom on</code> (8 iterations, resolution 256, intensity 0.8, threshold 0.6, soft knee 0.7), <code>sunrays on</code> (resolution 196, weight 1), <code>background #000000</code> . Canvas resolution capped at <code>devicePixelRatio 1</code> .
Interaction	10-splat burst when the hero intro completes; pointer movement over the page paints ink (hover mode); scrolling "stirs" the fluid — every ≥50ms the accumulated scroll delta injects a vertical splat at the pointer position (force clamped ±6% of <code>splatForce</code> , colour strength $\min(1, \Delta /40)$). Touch handlers are passive.
Notes	Engine API (<code>start, stop, togglePause, multipleSplats, splatAtLocation, setConfig, downloadScreenshot</code>) matches the open-source <code>webgl-fluid-enhanced</code> package (identification inferred; the package name is not in the bundle). A "tuned" mode exists in code (calmer ink, auto edge splats every 2,300ms, per-beat splats in brand colours) but the homepage passes <code>fluid: "baseline"</code> .

Name	Vignette
Where	Fixed layer <code>z-[1]</code> over the canvas
Trigger	Static
Timing	<code>radial-gradient(ellipse 68% 54% at 50% 50%, rgba(0,0,0,.62) 0%, rgba(0,0,0,.34) 46%, rgba(0,0,0,0) 76%)</code>
Interaction	—
Notes	Darkens the centre so white text stays legible over the ink.

Name Hero intro / reveal
Where section#opening
Trigger 3,000ms after mount, or the first wheel / touchmove / keydown
Timing Row `grid-template-rows` 0fr → 1fr 1,000ms ease-in-out; spacer `flex-grow` 1,000ms ease-in-out; card opacity+translateY(8px) 900ms ease-out delay 1,000ms; partner row delay 1,700ms; READ OUR STORY delay 2,200ms; tagline fade+slide 700ms delay 200ms (on load)
Interaction Page also forces `history.scrollRestoration = "manual"` and scrolls to top on load.
Notes See the 9-frame sequence `_motion/hero-desktop-*.png`.

Name Wordmark pulse + float
Where H1 "Sparkonomy"
Trigger On load, infinite
Timing `wordmark-pulse` 0.5s ease-in-out infinite alternate per letter, delays 0, 0.1 ... 0.9s (colour → #6C63FF, glow 0 0 10px #6c63ffb3); `wordmark-float` 2s ease-in-out infinite alternate (translateY 0 → -10px)
Interaction —
Notes Paused while the hero is off-screen (`[data-offscreen]` * → `animation-play-state: paused`).

Name CTA gradient sweep
Where All gradient pill CTAs
Trigger Infinite
Timing `cta-sweep` 3.5s ease-in-out infinite alternate (background-position 60% → 0%)
Interaction Hover: opacity .9 in 150ms
Notes Creator Record CTA pauses when off-screen.

Name Partner logo marquee
Where Hero
Trigger Starts 1,700ms after the intro; paused when hero off-screen
Timing `story-marquee` 24s linear infinite (translateX 0 → -50% over two copies of the list)
Interaction —
Notes Edge fade via `mask-image: linear-gradient(90deg, transparent, #000 10%, #000 90%, transparent)` . Reduced motion: static wrapped row.

Name Scroll cue
Where READ OUR STORY
Trigger Infinite
Timing `scroll-cue` 1.4s cubic-bezier(.33,0,.2,1) (translateY 0 → 7px at 35% → 0) + `cue-pulse` 1.4s ease-in-out (colour #FFFFFFF4D → #C4BEFFCC, glow 0 0 10px #6c63ff99)
Interaction Click → starts the automatic story tour
Notes —

Name	Scroll-driven beat reveals
Where	Story screens #roots, #people, #reality, #love, #turn, #mission, #future (+ #ocg heading/card)
Trigger	Scroll position
Timing	opacity 0 → 1 + translateY 16px → 0 across each beat window (smoothstep); stage fades out over the last 10% of travel; "soften" mode (#reality) dims earlier lines to 75% opacity as the next enters; will-change: transform only while animating
Interaction	Reverses when scrolling back up
Notes	See <code>_motion/beats-people-*</code> , <code>_motion/beats-reality-*</code> .

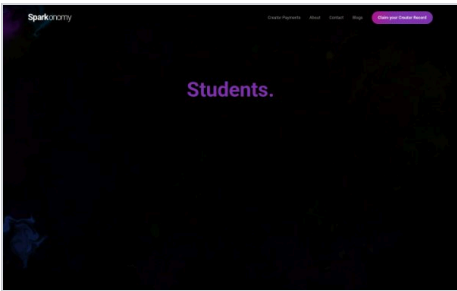

Name	Word "ink" colour reveal
Where	Story body lines, mission heading, OCG body/pitch
Trigger	When the beat completes (scroll) or on intersection
Timing	Each word starts white and blends (<code>color-mix</code>) into the line colour over 500ms; word k starts at 200ms + (character offset / 15) · 1000ms (≈15 characters per second); progress = max(elapsed time, scroll progress × total)
Interaction	—
Notes	Mission heading inks to #DE0075; body lines to <code>rgba(255,255,255,.75)</code> ; "every day" uses a CSS transition <code>color 600ms ease-in-out</code> with delays 900ms + 300ms per word.

Name	Automatic story tour + beat snapping
Where	Whole page
Trigger	10s without wheel/touch/pointer/key input, or a click on READ OUR STORY
Timing	Glides to the next beat stop with <code>easeInOutCubic</code> ; duration clamp(1,000ms, Δy /viewportHeight × 900ms, 2,400ms) (people beats 500ms, reality beats 1,000ms); holds 3,000ms per beat and 5,000ms on the last beat of each screen and at the page end. Snapping: 300ms after manual scrolling stops between beats, it glides to the next beat in the scroll direction.
Interaction	Any input cancels it; it restarts after another 10s idle. Disabled while the mobile menu is open (body overflow hidden) or the tab is hidden.
Notes	Verified live: with no input, scrollY moved 0 → 1,047px about 14.6s after navigation and continued through the story.

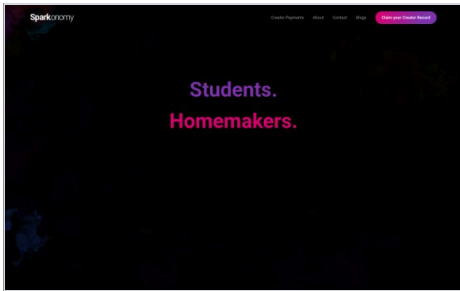

Name	Creator Record card expand (mobile)
Where	#ocg card <768px
Trigger	Section heading bottom passes 72px from the top (collapses again >160px)
Timing	height 0.9s open / 0.54s close, ease cubic-bezier(.22,1,.36,1); rows stagger 0.08s (delay 0.12s), each opacity 0 → 1 + y 8 → 0 in 0.45s; collapse stagger 0.03s reverse, 0.2s; "Certified" stamp fade 0.4s delay 0.63s
Interaction	—
Notes	Desktop/tablet: always expanded; whole grid pinned with <code>position: sticky</code> .

Name	Hover transitions
Where	Links, social icons, CTAs
Trigger	Hover
Timing	color / opacity 150ms cubic-bezier(.4,0,.2,1)
Interaction	—
Notes	No transforms, shadows or underline animations.

```

16 Social media links

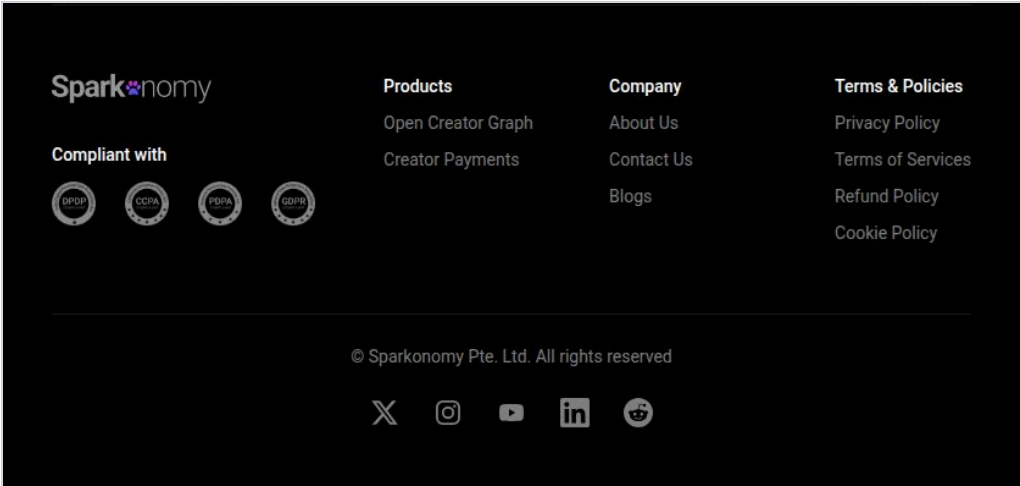

Platform	Exact URL	Location	Icon	aria-label	Target / rel
X/Twitter	https://x.com/SparkonomySays	Footer	inline SVG	X	_blank / noopener noreferrer
Instagram	https://www.instagram.com/sparkonomy.official/	Footer	inline SVG	Instagram	_blank / noopener noreferrer
YouTube	https://www.youtube.com/@Sparkonomy.official	Footer	inline SVG	YouTube	_blank / noopener noreferrer
LinkedIn	https://www.linkedin.com/company/sparkonomy/	Footer	inline SVG	LinkedIn	_blank / noopener noreferrer
Reddit	https://www.reddit.com/user/Sparkonomy/	Footer	inline SVG	Reddit	_blank / noopener noreferrer

- All five profiles appear **only in the footer** as 24×24 inline-SVG icon links (no text), `target="_blank" rel="noopener noreferrer"`, colour `rgba(255,255,255,.5)` → white on hover.
- The same five URLs are listed in the JSON-LD `Organization.sameAs`.
- Handles: X **@SparkonomySays**; Instagram **sparkonomy.official**; YouTube **@Sparkonomy.official**; LinkedIn company **sparkonomy**; Reddit user **u/Sparkonomy**.
- No Facebook, TikTok, Threads, Discord or WhatsApp links; no share buttons; no embedded feeds.

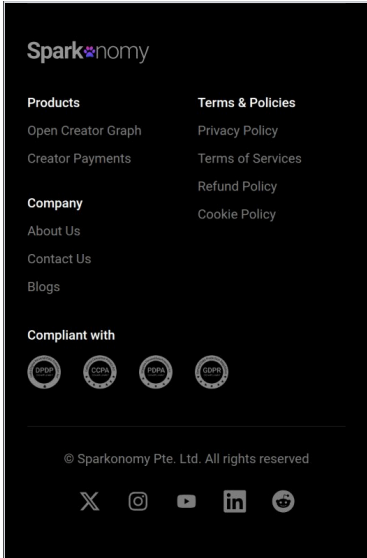

17 Footer

Desktop footer (1440px)

Tablet 834

Mobile 390

Columns (desktop grid 1.6fr 1fr 1fr auto , gap 40px)

Column	Heading	Links (exact text → URL)
1	—	Sparkonomy wordmark (grey, 24px tall) + "Compliant with" → DPDP, CCPA, PDPA, GDPR badges (36×36, opacity .55)
2	Products	Open Creator Graph → https://creatorgraph.sparkonomy.com (new tab) · Creator Payments → /creator/earn
3	Company	About Us → /about · Contact Us → /contact · Blogs → /blogs
4	Terms & Policies	Privacy Policy → /legal/privacy-policy · Terms of Services → /legal/terms · Refund Policy → /legal/refund-policy · Cookie Policy (button, opens CookieYes)

Bottom row

- Divider: 1px rgba(255,255,255,.1), margin-top 56px (40px mobile).
- "© Sparkonomy Pte. Ltd. All rights reserved" — 14px/20px, white/50, centred.
- Social icons (24×24, gap 28px, white/50 → white): X <https://x.com/SparkonomySays> · Instagram <https://www.instagram.com/sparkonomy.official/> · YouTube <https://www.youtube.com/@Sparkonomy.official> · LinkedIn <https://www.linkedin.com/company/sparkonomy/> · Reddit <https://www.reddit.com/user/Sparkonomy/>

Spacing

padding: 0 40px 48px (desktop) / 0 24px 48px (mobile); inner padding-top: 56px / 40px; column link stacks gap: 10px; total height 394px at 1440px.

Note the label differences vs. the header: header "About"/"Contact" vs footer "About Us"/"Contact Us" (same URLs).

18 Responsive behaviour

Breakpoints

Tailwind defaults (640 / 768 / 1024 / 1280 / 1536px). The homepage effectively switches at **768px (md)** only; story type above 768px is fluid via `clamp()`.

	Desktop 1440×900	Tablet 834×1112	Mobile 390×844
Header	Logo 26px + 4 links + pill CTA	same as desktop (≥768px)	Logo 24px + hamburger; full-screen menu
Wordmark	96px	96px	50.7px (13vw)
Story H2	64px (4.45vw capped at 4rem)	44px (clamp minimum)	44px
Story body	28.8px	20px	20px
Hero card	560px wide, padding 40/40/28	560px	368px max, padding 36/16/32
Partner marquee	560px, gap 48px	560px	full bleed, gap 40px
Creator Record	2-col grid (340px card + text), sticky	2-col grid	stacked; card collapsed until heading passes
Footer	4-column grid	4-column grid	wordmark + 2-col links + badges
Page height	17,082px	20,766px	15,984px

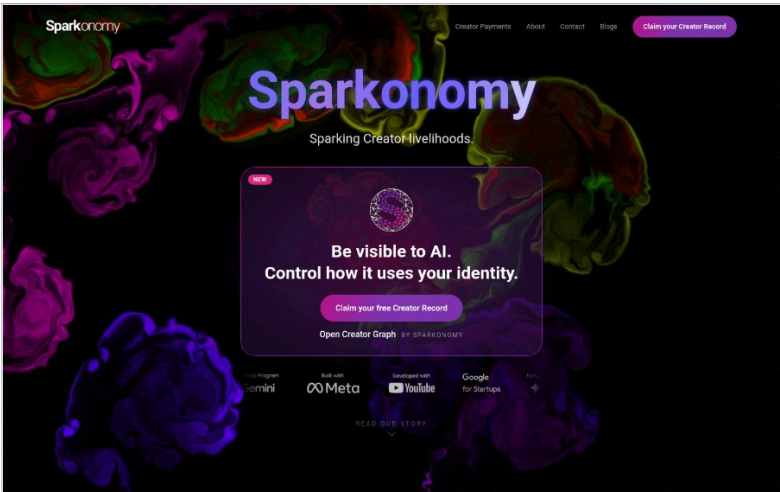

Mobile specifics

- Hamburger menu with partner + compliance badges (not shown in the desktop header).
- Line breaks are art-directed per breakpoint (`<br class="md:hidden"> / hidden md:block`), e.g. "For years, / we built / the platform." and "But what stayed with us were / the Creators / who brought it to life."
- Height units use `svh / lvh` so mobile browser chrome does not cause jumps; the fluid canvas is 100lvh.
- Touch: fluid touch handlers are passive; touchstart cancels the auto-tour.
- Cookie banner spans the full width (366×127px) and covers the top of the hero until dismissed.

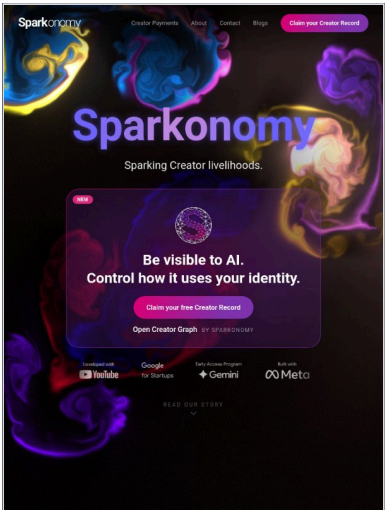

Not verified

- Landscape phones, very wide screens (>1536px) and 1024–1280px laptop widths were not captured: **Unable to determine** exact rendering there beyond what the CSS implies.

19 Technical findings

Framework & build

- **Next.js 16.0.7** (`window.next = {version: "16.0.7", appDir: true}`), App Router with React Server Components (`self.__next_f` flight payload), **Turbopack** production chunks (`turbopack-e1c03c7346098e89.js`). The page body bails out to client-side rendering (`<template data-dgst="BAILOUT_TO_CLIENT_SIDE_RENDERING">`), but the story markup is server-rendered.
- **React 19** — the client bundle carries `19.3.0-canary-52684925-20251110` (Next's vendored React); the module path references `react@19.2.5 / react-dom@19.2.5`.
- **Tailwind CSS** (v3.x inferred from the `--tw-*` preflight variables and `size-*` utilities; no version banner) + **tailwindcss-animate** (`animate-in fade-in slide-in-from-bottom-3`), `shadcn/ui`-style HSL tokens in `:root` (`--primary: 222.2 47.4% 11.2%, --primary-foreground: 210 40% 98%`).
- **Framer Motion** (`motion.*` components, `useScroll`, `useTransform`, `useMotionValueEvent`) for scroll-linked beats; version **Unable to determine**.
- WebGL2 fluid simulation (see Animations), loaded as a separate lazy chunk (`4884221f851638c7.js`, 55KB).
- Polyfills: `core-js 3.38.1`. `react-hot-toast` (goober) is present in a shared chunk but not used on the homepage.
- `/runtime-env.js` sets `window.__ENV__ = {"API_BASE": "https://app-api.sparkonomy.com"}`.

Hosting, delivery, headers

- **server**: Google Frontend, via: `1.1 google` → served from Google Cloud (exact product, e.g. Cloud Run vs App Engine, **Unable to determine**). `/logos/ocg-mark.webp` returns `server: UploadServer` (Google Cloud Storage signature). Third-party CDNs: Cloudflare (CookieYes).
- **HTML**: `cache-control: s-maxage=31536000`, `x-nextjs-cache: HIT`, `x-nextjs-prerender: 1`, `x-nextjs-stale-time: 300` (prerendered/ISR), gzip, HTTP/3 advertised (`alt-svc: h3`).
- **Security headers**: `strict-transport-security: max-age=63072000; includeSubDomains; preload`, `x-frame-options: SAMEORIGIN`, `x-content-type-options: nosniff`, `referrer-policy: strict-origin-when-cross-origin`. No Content-Security-Policy header observed.
- `content-signal: ai-train=yes, ai-search=yes` (Cloudflare-style content-signals header permitting AI training and search).
- Images via the Next.js optimiser (`/_next/image?url=...&w=...&q=75`, AVIF served to Chrome, `1x/2x srcSet`); header logo priority; OCG mark preloaded and unoptimised.
- Fonts: next/font self-hosting (Roboto variable, Solitreo) with `<link rel="preload" as="font" crossorigin>`.
- Next `<Link>` prefetches RSC payloads for `/contact`, `/about`, `/blogs`, `/creator/earn`, `/legal/*` on load.
- Desktop load: 85 requests (18 first-party JS chunks, 2 CSS files of 21,049 + 486 bytes transferred, 2 fonts, 13 first-party images, 33 RSC prefetch fetches).

Analytics, tags, consent

- **Google Tag Manager** GTM-K66374CX.
- **Google Analytics 4** G-87CRRH8FXM (inline `gtag('config', ..., {send_page_view: false, cookie_flags: 'SameSite=None;Secure'})` + a manual `page_view` event) and a second GA4 stream G-3G6S0WHSKP seen in collect hits (configured inside GTM).
- **Microsoft Clarity** project `dwiqlxestpk` (loaded via the npm integration, `?ref=npm`).
- **CookieYes** consent banner (`cdn-cookieyes.com/client_data/373b191ed956d51fb9a13f028b26a8d6/...`); Google Consent Mode v2: the inline script sets every consent type to `granted` by default, while CookieYes's Consent Mode debug log at capture time reported `Default/Update denied` — the effective default state is therefore **Unable to determine** without a consent audit.
- All first-party analytics are gated by `window.__SPARK_ANALYTICS__` (true only on `www.sparkonomy.com / sparkonomy.com`).
- `facebook-domain-verification` meta present (no Meta Pixel requests observed).

SEO & metadata

- `<title>`: "Sparkonomy – Sparking Creator Livelihoods"; meta description, keywords, `author` "Team Sparkonomy", `robots / googlebot index, follow`; canonical `https://www.sparkonomy.com/`; `lang="en"`; `og:locale en_IN`; OG + Twitter card (`summary_large_image`) with `/og-home-v2.png` 1200×630.

- JSON-LD: Organization (+ sameAs to the 5 social profiles), WebSite, WebPage (with abstract). The Organization logo is declared as 512×512 but /sparkonomy.png is actually 663×501.
- Favicons 192×192, 512×512 and apple-touch-icon 180×180; theme-color #000000.
- Two <meta name="viewport"> tags are emitted (one with viewport-fit=cover).

Accessibility observations

- Good: sr-only H1 text with aria-hidden decorative letters, labelled icon links, aria-expanded / aria-controls on the menu toggle, Escape closes the menu, full prefers-reduced-motion fallback.
- Risks: very low-contrast text (READ OUR STORY at white/30 on black ≈ 2.5:1 at rest; menu labels white/30–35), the auto-scrolling tour (moves content without a pause control other than interacting), heavy GPU use from the fluid simulation, and the cookie bar overlapping the navigation.

20 Existing design system

There is no public design-system documentation; the system below is reconstructed from the computed CSS and the bundled constants (INK , CTA_LABEL , NAV , FOOTER ...).

Tokens

- **Colour:** black canvas; white text with opacity steps (.9/.85/.8/.75/.6/.5/.45/.35/.3/.1); brand inks #DE0075 magenta, #8134AF violet, #DD2A7B pink, #9747FF purple, #6C63FF indigo (plus #FF4F95 pinkLight, #22D3EE cyan, #FFB020 gold defined for the fluid "tuned" mode); semantic stance colours green/amber/red; CSS custom property --pink-to-purple: linear-gradient(162deg, #dd2a7b 4.78%, #9747ff 89.95%); shadcn HSL tokens --primary, --primary-foreground, --foreground-rgb: 255,255,255, --background-start-rgb / --background-end-rgb: 0,0,0.
- **Gradients:** CTA 110deg #DE0075 0–8% → #8134AF 45–100%; card border 133.52deg #DE0075 5.08% → #8134AF 28.61%; record border 160deg purple/magenta; glows as radial gradients.
- **Typography:** Roboto only; 4 weights (400/500/600/700); display 96, headline 64, sub-headline 44, card title 32, body-L 28.8, 24, 20, UI 15/14/13/12/11/10 (see Typography).
- **Spacing:** Tailwind 4px scale; recurring values 16/24/28/32/40/48/56/96px. Containers: 84rem (1344px) header & footer, 64rem (1024px) story text, 54rem (864px) Creator Record, 35rem (560px) hero card, 21.25rem (340px) record card.
- **Radius:** 9999px pills; 28px hero card; 24px/23px record card; 10px cookie bar (third-party); 6px cookie buttons.
- **Elevation:** no box-shadows; depth comes from glows (radial gradients, blur-2xl) and gradient hairline borders built with CSS masks.
- **Motion:** 150ms hover; 500ms word ink; 900–1,000ms reveals; 3.5s CTA sweep; 24s marquee; easing smoothstep (scroll), cubic-bezier(.4,0,.2,1) (Tailwind default), cubic-bezier(.22,1,.36,1) (card), easeInOutCubic (tour).

Components

1. Fixed transparent header with scrim + gradient pill CTA; full-screen mobile menu.
2. Pill CTA (two sizes) with animated gradient.
3. "Launch card": translucent violet panel, gradient hairline border, NEW badge, product mark, title, CTA, caption.
4. Logo marquee (masked edges, duplicated list).
5. Pinned story screen (sticky 100svh stage, centred text, beat reveals, ink words, highlight colours).
6. Creator Record card (avatar + verified tick, claims row, stance pills, timestamp, stamp).
7. Footer (4-column grid, badges, social icons).
8. Third-party CookieYes top bar.

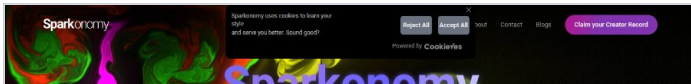

Consistency notes

- One CTA destination everywhere (Open Creator Graph app); two CTA labels ("Claim your Creator Record" in navigation, "Claim your free Creator Record" in content).
- Header vs footer labels differ ("About" vs "About Us", "Contact" vs "Contact Us").
- "Terms of Services" (footer) is grammatically non-standard.

21 Screenshots

All files are full-resolution PNGs in `screenshots/` (this PDF embeds down-sampled copies). Because the page is a stack of pinned screens over a fixed canvas, the automatic full-page captures look mostly black; the logical-section shots and the scroll storyboard are the reliable visual record.
